# A BILL FOR AN ACT

RELATING TO MENTAL HEALTH SERVICES FOR CHILDREN AND ADOLESCENTS.

**BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:**

1           SECTION 1. The legislature finds that addressing mental  
2 health needs early in life is imperative for better health and  
3 well-being in adulthood. Adverse childhood experiences, various  
4 forms of trauma during a child's development, are linked to a  
5 greater likelihood of lifelong risky behaviors that can lead to  
6 chronic diseases and poor mental health, including depression,  
7 anxiety, and suicidality.

8           The importance of children and adolescent mental health was  
9 emphasized during the COVID-19 pandemic. The pandemic  
10 significantly impacted the social, emotional, and mental  
11 well-being of youth globally. Hawaii children and adolescents,  
12 like those in other states in the nation, were more likely to  
13 have depression and anxiety after the first year of the COVID-19  
14 pandemic.

15           The child and adolescent mental health division of the  
16 department of health is the State's medicaid provider of  
17 intensive mental health services for youth. Services provided

1 by the division may be described as a multi-tiered and  
2 multi-agency system of care.

3       The child and adolescent mental health division receives  
4 referrals from, and provides mental health services in  
5 coordination and collaboration with, other state government  
6 agencies, as appropriate. For example, the division may receive  
7 a client who is housed in a detention home, has been abused, and  
8 has dropped out of school. The division will provide the child  
9 with treatment and services in coordination with other state  
10 agencies, including the judiciary, child welfare services, and  
11 department of education, that may be involved given the child's  
12 circumstances. To minimize disruptions in the daily lives of  
13 the clients and their families, the division provides its  
14 clients with community-based services and supports by  
15 contracting with mental health professionals who practice near  
16 or in the communities where eligible children and adolescents  
17 live.

18       The purpose of this Act is to clarify and update the  
19 responsibilities of the child and adolescent mental health  
20 division of the department of health to reflect the current

1 mental health systems of care that address mental health needs  
2 of children and adolescents in the State.
