THE USE OF DISPOSABLE SURGICAL EQUIPMENT AND ADOPTION OF  
SUSTAINABLE PRACTICES IN THE PROVISION OF HEALTH CARE  
SERVICES FOLLOWING EXAMPLES SET BY CALIFORNIA AND JAPAN.

1           WHEREAS, the State recognizes the environmental and  
2 economic impacts associated with the excessive use of disposable  
3 surgical equipment; and  
4

5           WHEREAS, hospitals and health care facilities generate

7 surgical instruments and supplies and contributes to landfill  
8 overflow and environmental pollution; and  
9

10           WHEREAS, California has implemented programs that encourage  
11 the use of reprocessed and sterilized surgical instruments,  
12 reducing medical waste and lowering costs for health care  
13 facilities; and  
14

15           WHEREAS, Japan has successfully adopted advanced  
16 sterilization and recycling techniques to extend the lifespan of  
17 surgical instruments while maintaining the highest standards of  
18 patient safety and infection control; and  
19

20           WHEREAS, reducing the reliance on disposable surgical  
21 equipment in the State aligns with the State's commitment to  
22 sustainability and environmental stewardship; and  
23

24           WHEREAS, adopting the use of reusable and reprocessed  
25 surgical equipment can lead to substantial cost savings for  
26 health care institutions while maintaining high-quality patient  
27 care; now, therefore,  
28
