# A BILL FOR AN ACT

RELATING TO STORMWATER MANAGEMENT SYSTEMS.

**BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:**

1       SECTION 1. The legislature finds that detention and  
2 retention ponds are meant to hold stormwater. However, while  
3 detention and retention ponds help manage stormwater and control  
4 flooding, mitigating risk for these systems is critical in  
5 minimizing threats to public health and safety. Hawaii's high  
6 drowning rate, the second worst in the nation for residents and  
7 the highest for visitors, necessitates joining other  
8 jurisdictions across the United States in developing retention  
9 and detention pond safety programs. The urgency is made even  
10 greater by climate change, which has created more frequent and  
11 intense rainfall resulting in increased use of retention ponds,  
12 which are designed to hold water year-round, and detention  
13 ponds, which remain dry until a major rain.

14       The legislature further finds that the Hawai'i Water Safety  
15 Plan, which was published by the Hawaii Water Safety Coalition  
16 in 2025, provides several recommendations to reduce drowning by

1 improving safety regarding detention and retention ponds in the  
2 State.

3 The purpose of this Act is to:

4 (1) Ensure the health, safety, and welfare of the citizens  
5 of the State by requiring the counties to:

6 (A) Regulate the permitting, construction, and  
7 maintenance of retention and detention ponds,  
8 including establishing safety standards for  
9 retention and detention ponds; and

10 (B) Conduct a survey of existing retention and  
11 detention ponds statewide and provide a report to  
12 the legislature; and

13 (2) Appropriate funds as a grant-in-aid to the counties  
14 for these purposes.

15 This Act also recognizes Charlotte "Sharkey" Schaefers, the  
16 five-year-old girl who drowned at a Pearl City naval housing  
17 complex while trying to save the life of her childhood friend.

18 SECTION 2. Chapter 46, Hawaii Revised Statutes, is amended  
19 by adding a new section to be appropriately designated and to  
20 read as follows:

"§46- Retention ponds and detention ponds; safety requirements. (a) Beginning \_\_\_\_\_, \_\_\_\_\_, each county shall adopt ordinances for the regulation of all retention and detention ponds located within the county's jurisdiction. The ordinances adopted pursuant to this subsection shall include but not be limited to:

(1) Establishing a permitting process for the construction of new retention or detention ponds;

(2) Establishing safety requirements, which shall include  
but not be limited to:

(A) Fencing that is at least four feet high that fully encloses the retention or detention pond and allows access through one or more secured, locked gates;

(B) Safety signage indicating "No Swimming" and  
warning of sudden water level changes;

(C) Installation of life buoys at entry points for  
emergency rescue;

(D) Proper maintenance of ground cover surrounding the retention or detention pond, including mowing, weed control, and debris removal;

1           (E) Minimal use of pesticides and fertilizers on  
2           ground cover surrounding the retention or  
3           detention pond to prevent contamination of  
4           downstream waters;

5           (F) Installation of landscaped buffers to discourage  
6           entry by unauthorized individuals;

7           (G) Incorporation of emergency spillways to handle  
8           overflow situations; and

9           (H) Submission of maintenance plans by property  
10          owners or managers to ensure ongoing safety and  
11          compliance;

12          (3) Conducting inspections to ensure compliance with  
13          safety and maintenance regulations; and

14          (4) Maintaining a registry of all retention and detention  
15          ponds within the county and conducting periodic  
16          surveys to assess their condition.

17          (b) For the purposes of this section:

18          "Detention pond" or "dry-retention system" means an area  
19          that is designed to:

1       (1) Hold stormwater until the effects of percolation,  
2       evapotranspiration, or controlled release return the  
3       area to its normally dry state; and

4       (2) Dissipate inflowing stormwater within seventy-two  
5       hours to accommodate a new volume of water.

6       "Retention pond" or "wet-detention system" means a  
7       permanent or semi-permanent aquatic system that acts as a trap  
8       where pollutants picked up by the initial surge of stormwater  
9       settle out before leaving the system."

10       SECTION 3. Each county shall conduct a survey of all  
11       existing retention and detention ponds located within its  
12       jurisdiction and submit a report of its findings and  
13       recommendations, including any proposed legislation, to the  
14       legislature no later than twenty days prior to the convening of  
15       the regular session of 2026.

16       SECTION 4. There is appropriated out of the general  
17       revenues of the State of Hawaii the sum of \$                or so  
18       much thereof as may be necessary for fiscal year 2025-2026 and  
19       the same sum or so much thereof as may be necessary for fiscal  
20       year 2026-2027 for a grant-in-aid to the city and county of  
21       Honolulu and the counties of Hawaii, Kauai, and Maui, to conduct

1 a survey of all existing retention and detention ponds located  
2 within its jurisdiction and adopt ordinances for the regulation  
3 of retention and detention ponds located within its  
4 jurisdiction.

5 The sums appropriated shall be expended by the counties for  
6 the purposes of this Act.

7 SECTION 5. New statutory material is underscored.

8 SECTION 6. This Act shall take effect on July 1, 3000.

**Report Title:**

Retention Ponds; Detention Ponds; Regulation; Counties; Grant-in-Aid; Appropriation

**Description:**

Requires the counties to adopt ordinances for the regulation of retention and detention ponds. Requires the counties to conduct a survey of existing retention and detention ponds and make a report to the Legislature. Appropriates funds as a grant-in-aid to the counties. Effective 7/1/3000. (HD2)
