A BILL FOR AN ACT

RELATING TO HEALTHCARE PRECEPTORS.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that there is a shortage
2 of health care providers in the State, particularly primary care
3 providers, which will be exacerbated by the projected retirement
4 of current physicians, advanced practice registered nurses,
5 pharmacists, and other health care workers. Although students
6 are interested in pursuing careers in Hawaii's health care
7 service industry, in-state educational institutions are
8 constrained by the lack of clinical education sites in the State
9 and the limited supply of qualified preceptors. One way to
10 encourage the participation of preceptors is to offer an income
11 tax credit for health care professionals who serve as
12 preceptors.

13 The purpose of the existing healthcare preceptor income tax
14 credit is to incentivize volunteer preceptors to offer
15 professional instruction, training, and supervision to students
16 and residents seeking careers as health care providers in the
17 State. The legislature finds that although many providers have

1 trained eligible students, modifications to the exiting program
2 will amplify the success of the program.

3 The legislature further finds that the preceptor tax credit
4 program has been successful in facilitating the growth of the
5 preceptor program. The five-year evaluation of the program
6 found a seventy-seven per cent increase in active preceptors who
7 taught at least one rotation, and seventy-six providers started
8 precepting during this five-year period. The report also
9 recommended that to improve the function of the program,
10 additional health care provider professions that have
11 established schools in Hawaii should be added to the tax credit
12 eligibility, the primary care specialty requirement for
13 preceptors should be removed, and the requirement that the
14 preceptor credit should only be for precepting students enrolled
15 in a primary care program should be removed.

16 The legislature recognizes that programs training
17 physicians, advanced practice registered nurses, pharmacists,
18 and physician assistants in primary care also require training
19 from specialty preceptors. The legislature further recognizes
20 that the health care workforce has shortages in professions
21 beyond those included in the tax credit and whose workforce

1 expansion is also limited by available preceptors, including
2 social workers, physician assistants, and registered dietitians,
3 as well as workers in high-demand specialties such as behavioral
4 health. As such, the healthcare preceptor tax credit should not
5 be limited to physicians, advanced practice registered nurses,
6 and pharmacists and should be expanded to be applied across all
7 eligible professions. Finally, the legislature finds that the
8 definition of "volunteer-based supervised clinical training
9 rotation" should be clarified to facilitate the preceptor credit
10 assurance committee's implementation of the tax credit.

11 Therefore, the purpose of this Act is to:

- 12 (1) Amend the definitions of "preceptor" and
13 "volunteer-based supervised clinical training
14 rotation" to improve accessibility for providers to
15 receive income tax credits for acting as preceptors,
16 including removing "primary care" from the criteria to
17 qualify as a preceptor;
- 18 (2) Add physician assistants, social workers, and licensed
19 dietitians to the list of preceptors and in the
20 definition of "eligible student";

(3) Expand eligibility for the tax credit to include accredited residency programs that require preceptor support; and

(4) Revise the membership of the preceptor credit assurance committee to include the director of health and residency programs with eligible students.

SECTION 2. Section 235-110.25, Hawaii Revised Statutes, is amended by amending subsection (g) to read as follows:

"(g) For the purposes of this section:
