
A BILL FOR AN ACT

RELATING TO PREVENTIVE MEDICINE.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that access to preventive
2 medicine, including evidence-based clinical preventive services,
3 is fundamental to maintaining and improving the health of the
4 people of Hawaii. These essential preventive benefits and
5 protections are increasingly placed in jeopardy due to
6 unwarranted skepticism towards long-established and
7 scientifically validated medical recommendations.

8 The legislature further finds that clinical preventive
9 services recommended by the Advisory Committee on Immunization
10 Practices and the United States Preventive Services Task Force,
11 such as immunizations and other evidence-based preventive
12 interventions, are currently required to be covered by health
13 insurance without cost-sharing under the federal Patient
14 Protection and Affordable Care Act. However, if these
15 recommendations are withdrawn, invalidated, or otherwise no
16 longer recognized under federal law, these preventive medical
17 services may cease to be covered without cost-sharing.

1 The loss of no-cost access to these preventive services
2 would likely increase out-of-pocket health care expenses for
3 Hawaii residents, causing many individuals to delay or forego
4 preventive care. Such delays would increase the risk of
5 infectious disease outbreaks and contribute to the growing
6 burden of chronic disease across the State.

7 Accordingly, the purpose of this Act is to ensure continued
8 access to preventive medicine for Hawaii residents by:

- 9 (1) Establishing the Hawaii preventive services advisory
10 committee to serve in an advisory capacity to the
11 department of health on matters relating to clinical
12 preventive services;
- 13 (2) Authorizing the department of health to issue clinical
14 preventive service recommendations;
- 15 (3) Providing immunity for health care professionals who
16 provide clinical preventive services based on
17 recommendations of the department of health; and
- 18 (4) Requiring coverage of evidence-based clinical
19 preventive services without cost-sharing.

1 SECTION 2. Chapter 321, Hawaii Revised Statutes, is
2 amended by adding three new sections to part II to be
3 appropriately designated and to read as follows:

4 "§321-A Hawaii preventive services advisory committee;
5 established. (a) There is established within the department of

14 shall be subject to civil or criminal liability or professional
15 disciplinary action or deemed to have engaged in unprofessional
16 conduct for providing clinical preventive services in accordance
17 with recommendations made pursuant to section 321-31.

18 (b) No professional organization or association, health
19 care provider, or health care facility shall subject any person
20 to discipline, suspension, loss of license, loss of privileges,
21 loss of membership, or other penalty for providing clinical

1 preventive services in accordance with recommendations made
2 pursuant to section 321-31.

3 (c) Nothing in this section shall be construed to limit,
