STATE OF HAWAI'I | KA MOKU'ĀINA 'O HAWAI'I
DEPARTMENT OF CORRECTIONS AND REHABILITATION
Ka 'Oihana Ho'omalu Kalaima a Ho'oponopono Ola
1177 Alakea Street
Honolulu, Hawai'i 96813

No. _____

January 22, 2026

The Honorable Ronald D. Kouchi, President
and Members of the Senate
Thirty-Third Hawai'i State Legislature
State Capitol, Room 409
Honolulu, Hawai'i 96813

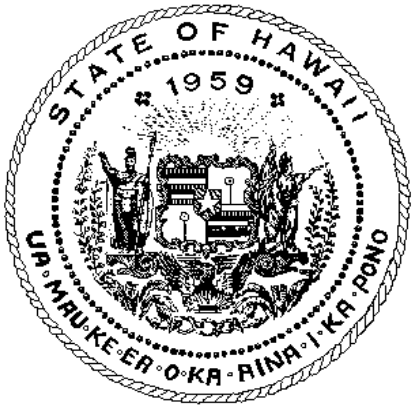

The Honorable Nadine K. Nakamura, Speaker
Members of the House of Representatives
Thirty-Third Hawai'I State Legislature
State Capitol, Room 431
Honolulu, Hawai'i 96813

Dear President Kouchi, Speaker Nakamura, and Members of the Legislature,

For your information and consideration, I am transmitting a copy of the Department of Corrections and Rehabilitation's Report on the Performance Indicator, as required by Section 353H-8, Hawai'i Revised Statues. In accordance with Section 93-16, Hawai'i Revised Statutes, I am also informing you that the report may be viewed electronically at https://dcr.hawaii.gov/publications/reports-to-legislature/.

Sincerely,

Tommy Johnson
Director

DEPARTMENT OF CORRECTIONS AND REHABILITATION

REPORT TO THE 2026 LEGISLATURE

Annual Report on the Performance Indicators Pursuant to Section 353H-8, Hawai‘i Revised Statutes

December 2025

HRS 353H - Performance Indicator Reporting

Under Hawai'i Revised Statutes §353H: Performance Indicators, the Department of Corrections and Rehabilitation submits this report to the 33rd Legislature of 2026. Below you will find the data as requested. Please note that the performance indicator data has been collected from November 1, 2024 to October 31, 2025.

§353H-Performance indicator reporting

a) The Department of Corrections and Rehabilitation shall develop performance measures that accurately reflect progress toward specific goals, including:

(1) Improving recidivism rates

The Interagency Council on Intermediate Sanctions (ICIS) is a collaborative partnership comprising the Judiciary, Department of Corrections and Rehabilitation, Department of the Attorney General, Department of Health, Office of the Public Defender, Hawai'i Paroling Authority, Department of the Prosecuting Attorney, and the Honolulu Police Department. The Council is dedicated to reducing recidivism by evaluating the effectiveness of risk assessment tools and correctional intervention programs. Findings from the latest recidivism study are scheduled for publication shortly.

To identify factors that may increase the likelihood of recidivism, the Reentry Coordination Office (RCO) developed a standardized Reentry Plan Form. This form is utilized by Correctional Case Managers statewide from the onset of an offender's incarceration to assess individual needs and guide pre-release planning. It serves as a structured tool for both Case Managers and offenders to develop a comprehensive and purposeful release plan that supports a pro-social lifestyle. To ensure continuity of care, the Reentry Plan is made available to the Hawai'i Paroling Authority (HPA), Adult Client Services commonly referred to as the Adult Probation Office, and community service providers upon request.

A key component of a meaningful release plan is stable housing. Offenders who are unable to successfully participate in a furlough program often encounter significant challenges in securing appropriate housing due to limited financial resources and lack of family support. Many must reside in clean and sober living facilities, as barriers such as poor or nonexistent credit history, low credit scores, and criminal records prevent them from obtaining independent rentals.

To address these challenges, the RCO and HPA maintain contracts with several clean and sober dwellings to provide safe, substance-free environments for furloughees and parolees, alleviating the immediate financial pressure of rent during the transition back into the community.

The following clean and sober houses were contracted to provide housing from Nov. 1, 2024 to Oct. 31, 2025 for furloughees and parolees:

Clean and Sober Housing	Gender	No. of furloughees and parolees
Makana O Ke Akua - Oahu (Gift of God)	M	59
Mālama Recovery - Maui	F	4
Women in Need - Oʻahu	F	7
Women in Need - Kauaʻi	F	3

In recognition of the housing challenges faced by parolees, the 2024 Hawai'i State Legislature awarded the Hawai'i Paroling Authority (HPA) $180,000 to expand community housing. Under the most recent contract, HPA has partnered with the RCO to utilize these funds to increase the number of community housing beds available to parolees.

Employment remains a key determinant of an offender's successful reintegration into the community following release. Accordingly, the RCO has renewed its contract with the Goodwill Industries on Oahu and Hawai'i island to continue providing critical employment-related services. Between November 1, 2024 and October 31, 2025, Goodwill delivered job readiness training, employment counseling, and reentry support to 182 parolees and furloughees.

The DCR's partnerships with community service providers play a vital role in ensuring a continuum of care and support for offenders following their release. It's important to acknowledge that without these collaborative services, many offenders would face significant challenges in successfully navigating their reentry process.

Parents and Children Together (PACT) primarily serves furloughees, but its services are also available to released offenders. PACT offers job readiness support, including assistance with resume development and access to computer labs for job searching. Additionally, the program provides bus passes and employment-related items to facilitate successful workforce participation.

Transforming Lives conducts reentry classes that connect offenders with community and housing agencies to support effective reentry planning. The organization has facilitated clean and sober housing placements for individuals facing homelessness. It also partners with DCR and HPA to host annual Resource Fairs at the Hālawa Correctional Facility, Waiawa Correctional Facility, and the Women's Community Correctional Center. Transforming Lives also collaborates with DCR and HPA to host consortiums that promote best practices and strengthen partnerships and reduce recidivism.

United Self-Help have partnered with the DCR for several years to assist offenders transitioning back into the community. They meet with individuals scheduled for release who require transportation and help identify their immediate post-release needs. On release day, United Self-Help transports offenders to essential service agencies- including the Waikīkī Health Center, Social Security Administration, Department of Health, Department of Motor Vehicles, and Department of Human Services before taking them to their designated residences.

The Waikīkī Health Center continue to play a vital role in providing services to inmates in both prisons and jails on Oʻahu. They conduct intake sessions prior to release to assist with MedQuest, SNAP, and welfare applications, and coordinate with partner agencies on the neighbor islands for continuity of care. Following release, offenders are encouraged to access the Center's comprehensive services, including behavioral health, primary care, dental, optometry, pharmacy, Native Hawaiian healing, and women's health.

The Waikīkī Health Center also assists individuals with obtaining identification documents and providing bus passes and clothing. It also offers a mailing address, particularly those in furlough programs.

The data below reflect offenders served between November 1, 2024 and October 31, 2025:

Waikīkī Health Center Pu'uhonua Services	No. of participants
Pre-Release Education	1,699
Services	306

Project Vision Hawai'i (PVH) is a nonprofit organization dedicated to extending mobile health and human services to increase access to care for underserved communities across the state. Currently, PVH's Social Services Assistance program provides critical support to the Women's Community Correctional Center (WCCC) by helping eligible offenders apply for Med-QUEST health coverage prior to their release. This proactive support ensures that these women will have immediate access to essential healthcare upon completion of their sentences or when released on parole. The following number of participants include the women scheduled for release from WCCC that Project Vision Hawai'i staff provided services to from late September 2025 through October 2025:

Project Vision Hawai'i (O'ahu)	No. of participants (Women's Community Center)
MedQuest Application Support	19

Partnerships with various government agencies are also a critical component of the DCR's reentry efforts. The Attorney General's Office - Child Support Enforcement Agency (CSEA) provide services that educate offenders about their individual cases, assist in modifying monthly CSEA payments, and develop affordable repayment plans for outstanding CSEA debt. This service is essential to successful reentry as improving an offender's relationship with the CSEA encourages responsibility in fulfilling parental obligations. CSEA provides these services both in person and via Zoom statewide and those incarcerated at the Saguaro Correctional Center in Arizona.

From November 1, 2024 to October 31, 2025, CSEA met with 104 offenders across the facilities.

The City and County- TEAM WorkHawai'i provides job readiness programs at the Waiawa Correctional Facility. Their services include assisting offenders with creating and updating resumes, improving interview skills, understanding employer expectations, and developing individualized goals and actionable pathways to achieve them. TEAM WorkHawaii also offers one-on-one case management, continuing support after release. Offenders who secure stable employment and meet program criteria may be referred to the Rent to Work Program to receive rental assistance.

The Department of Labor and Industrial Relations and Workforce Development Division in Hilo were key contributors in planning the first Resource Fair at the Hawai'i Community Correctional Center-Hale Nani Facility in May 2025. The event brought together various agencies to meet with offenders and share information about their services. The Hawai'i County Department of Motor Vehicles also participated in the event.

The Veterans Justice Outreach Program also meets with offenders who have served in the military to determine benefits based on discharge status. This service is available statewide on an as-needed basis.

DCR maintains its partnership with the State Department of Transportation and the City and County of Honolulu Department of Motor Vehicles through the State ID Project. Currently, the Hālawa Correctional Facility and Women's Community Correctional Center share the State ID mobile unit to provide offenders with State IDs at their respective facilities.

The RCO continues to collaborate with DCR Education Services, Healthcare Services and Hawai'i Correctional Industries to develop comprehensive reentry pathways

2) Decreasing prisoner assaults on correctional staff

From Nov. 1, 2024 to Oct. 31, 2025, correctional facilities statewide had an increase in inmate-on-staff assaults. There were 59 reported inmate assaults during this time period, more than double the number from last year.

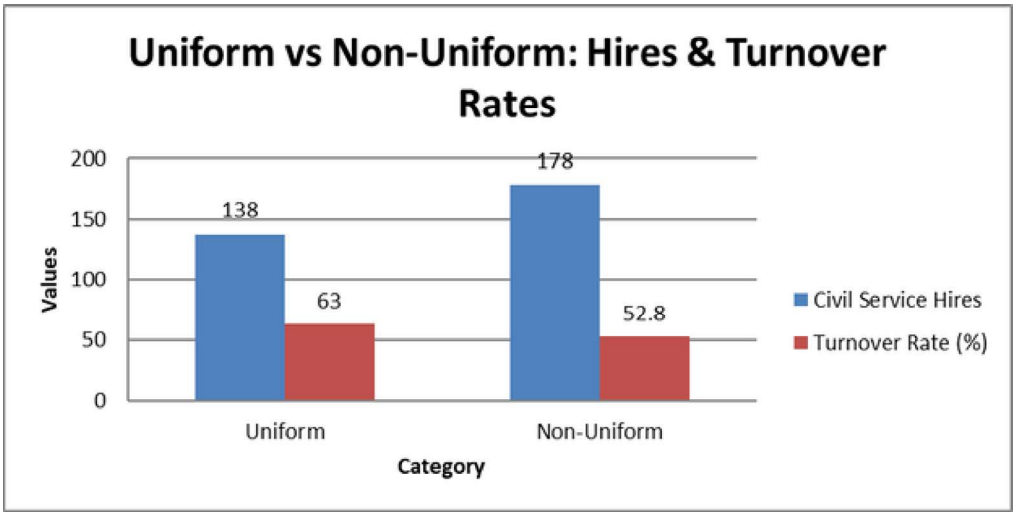

Managing the inmate population continues to be challenging as an inmate's behavior is unpredictable, impulsive and in many cases violent, depending on his/her mental health history, behavioral history and/or substance abuse history.

The 59 incidents reported were physical altercations. Even though the staffing shortage remains an issue, there have been improvements. Staffing improvements are allowing inmates more out-of-cell time, recreation, program participation, visitation and work opportunities. This has a direct effect on reducing stress and tension within facilities. The DCR has also implemented the use of tablets, allowing inmates to access and view programs and visitation within the housing units. We aim to expand the number of units and add more programs and entertainment.

(3) Reducing correctional staff turnover

The Department of Corrections and Rehabilitation continues to experience significant staffing challenges due to high turnover, burnout, promotions, resignations, retirements, and employees transferring to other job markets. The lingering effects of the COVID-19 pandemic, combined with longstanding vacancy levels have amplified operational strain across the Correctional Institutions Division.

The following table represents the new civil service hires and turnover rates by type of positions for FY 2025:

These turnover levels continue to create operational strain and increase workload on the remaining staff who have consistently demonstrated strong dedication by working extended hours and sustaining operations under demanding conditions.

To address these challenges, DCR implemented several major recruitment and workforce stabilization initiatives in FY 2025. The Recruitment Team participated in 16 job fairs and community outreach events — the highest number in departmental history. Additionally, DCR conducted eight Basic Corrections Recruit Classes— also the highest number in departmental history — which significantly increased the flow of new hires into facilities.

Recruitment modernized the ACO testing process by transitioning from paper-based exams to online proctored written testing, improving accessibility and processing time.

The Department further strengthened the physical assessment process by transitioning from the legacy Physical Agility Test to the standardized, equipment-based Corrections Officer Physical Ability Test (COPAT).

In partnership with the Department of Human Resources Development, HR launched the SkillBridge Program, creating a dedicated military-to-corrections pipeline that expands access to qualified, job-ready candidates. HR additionally implemented a department-wide anonymous survey platform accessible through mobile devices and workplace computers, enabling staff to provide confidential feedback. This tool allows leadership to identify concerns proactively, reinforce effective practices, and enhance morale, communication, and retention across all facilities, programs, and offices.

Collectively, these workforce modernization efforts represent DCR's commitment to reducing turnover, strengthening organizational stability, and supporting a safer, more resilient correctional environment.

(4) Improving departmental efficiencies in staffing, budgeting, and data management and analysis

DCR's FY 2025 initiatives contribute not only to reduced turnover but also to measurable improvements in government efficiency through modernized staffing systems, streamlined budgeting impacts, and enhanced data management capabilities. Transitioning to online proctored ACO written exams and the COPAT assessment reduced administrative labor, accelerated processing timelines, and improved data accuracy. The Department's partnership with an external recruiting agency and a paperless background check vendor further increased applicants and reduced delays associated with manual processing.

These technological and procedural upgrades improve workflow predictability, operational planning, and budget forecasting by enabling the Department to track applicant volume, hiring trends, vacancy durations, and recruitment success rates more accurately. The continued use of 89-day hires and SkillBridge Program supports efficient staffing allocation and allows leadership to maximize resources without compromising operational readiness.

The newly implemented anonymous employee survey tool enhances real-time organizational data collection, giving leadership direct insight into employee sentiment, workplace concerns, and facility-specific patterns that impact staffing and resource utilization. By leveraging this data, DCR can better target interventions, identify systemic inefficiencies, and support evidence-based decision-making.

Through these combined measures, DCR is strengthening internal systems, improving government accountability, and building a data-driven structure that ensures effective, efficient, and fiscally responsible management of correctional operations.

A core priority for IT Management is strengthening organizational capability through strategic investment in people and performance. Our focus is to build a resilient, high-performing IT workforce and streamline operations to better support departmental and enterprise-wide goals.

Key initiatives include expanding online training and structured mentoring programs, automating high-volume manual processes to increase productivity, and implementing performance standards and KPIs to drive accountability and measurable outcomes. We are also developing a modern self-service portal to enhance the user experience and improve service delivery.

To ensure long-term alignment between IT and business functions, we plan to establish a dedicated oversight role to coordinate strategy, resources, and operational priorities across the organization.

(b) The department shall develop key performance indicators, which shall include:

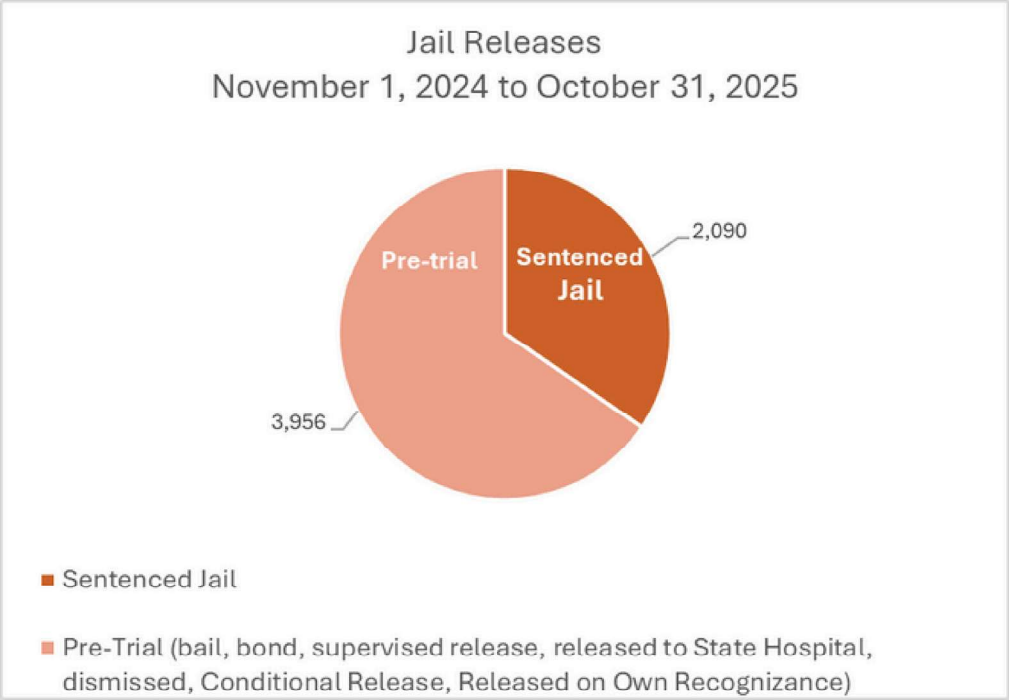

(1) The number of individuals enrolled in and who have completed a general education diploma (GED) or High School Equivalency Test (HiSET).

From November 1, 2024, through October 31, 2025, a total of 1,512 individuals enrolled statewide in Adult Basic Education or GED preparatory classes. Of those, there were 32 GED and five HiSET graduates.

(2) The number of individuals for whom a reentry plan is filed and the number of of individuals who exit jail or prison with a reentry plan;

Jails statewide have concentrated reentry efforts on sentenced offenders due to the unpredictable length of stay for pre-trial and pre-sentenced individuals. However, facility Case Managers provide community resource information to pre-trial or pre-sentenced offenders who request assistance.

Offenders released w/a reentry plan	Offenders released w/o a reentry plan
Prison = 514	Prison = 178
Jail = 238	Jail = 5,808
Total = 752	Total = 5,986

Offenders Released w/a birth certificate	Offenders released w/o a birth certificate
Prison = 533	Prison = 159
Jail = 227	Jail = 5,819
Total = 760	Total = 5,978

Offenders released w/a valid ID	Offenders released w/o a valid ID
Prison = 347	Prison = 345
Jail = 202	Jail = 5,814
Total = 549	Total = 6,189

Offenders released w/a SS card	Offenders released w/o a SS card
Prison = 315	Prison = 377
Jail = 192	Jail = 5,854
Total = 507	Total = 6,231

DCR payments of Birth Certificates and State IDs are reflected in the chart below from November 1, 2024 to October 31, 2025. DCR received special legislative funding to cover costs for both Birth Certificates and State IDs effective July 1, 2025.

No. of birth certificates paid by DCR	No. of State IDs paid by DCR
409	132

The RCO continues to provide a month's worth of bus fare to qualified parolees and max-outs (an inmate who completes his or her sentence) to assist with their transportation needs.

Offenders released with one-month Bus Passes only (Prison only)
HCF = 178
WCCC = 36
WCF = 16
KCCC = 2
MCCC = 15
OCCC Furlough = 2
Total = 249

(3) Drug test failure rates of inmates while incarcerated and while on parole.

CPSD Substance Abuse

In accordance with its drug detection policy, DCR collected six thousand one hundred sixty-three (6,163) urine specimens (64,774 individual assays tests) from the inmate population from November 1, 2024, through October 31, 2025. Out of the 6,163 samples collected, data indicates five hundred and six (506) samples or 8.21% of samples returned with positive results.

For inmates on parole, the average number of positive urinalysis tests during the period of November 1, 2024 through October 31, 2025 was 528 or 1.9%. (Note: This is based on an average monthly parole population of 1,006 during that time period).

Substance abuse Services data indicates that two hundred fourteen (214) inmates were enrolled in programing on October 31, 2025.

From November 1, 2024, through October 31, 2025, there were one hundred sixty-six (166) inmates in Hawaii and three hundred twenty-nine (329) inmates at Saguaro (Arizona) who participated in substance abuse-related treatment. Data indicates that one hundred fifty-eight (158) inmates across Hawaii and two hundred thirty-six (236) inmates at Saguaro successfully completed programming during the same reporting period. Program completions represent a 79.6% completion rate as opposed to 73.6% d

(4) The number of inmates currently enrolled in and who have completed drug treatment programs provided by the Department of Corrections and Rehabilitation.

The University of Hawai`i Office of Research Services administers The Ka Wehena o Ke `Ao program that provides a holistic approach and emphasizes that incarcerated individuals take responsibility for their choices. It provides a means to assist in the reparation or establishment of relationships with their families or other close relationships through cultural practices. This approach incorporates group sessions, one on one counseling and the Ohana Kukakuka Circle at the Waiawa Correctional Facility and Women's Community Correctional Center.

(5) The number of inmates currently enrolled in and who have completed restorative circles.

From November 1, 2024, through October 31, 2025:

- Waiawa Correctional Facility: 12 graduates, 44 one-on-one sessions, and one ʻOhana Kukakuka Circle.
- Women's Community Correctional Center: 10 graduates, 66 one-on-one sessions, and one ʻOhana Kukakuka Circle.

(6) The number of inmates who have applied for a reduction of their minimum sentence, the number of applications approved and denied, and, when applicable, the reasons for the denial of a parolee's application.

Total no. of inmates applied for reduction of their minimum sentence	No. of inmates approved for reduction of their minimum sentence	No. of inmates denied reduction of their minimum sentence	Reason for denial
188	63	125	Minimum sentence deemed appropriate

The decision by the Hawaii'i Paroling Authority on a request for reduction of minimum term will be:

(1) Deny request - minimum term remains appropriate;
(2) Deny requet - administrative review or interview scheduled;
(3) Defer request- administrative review or interview scheduled; or
(4) Deny request - early parole hearing scheduled.

(7) The number of parole revocation hearings and the results of parole revocation hearings that when applicable, explain why the parolees' revocation was denied.

Parole revocation hearings approved is the number of parolees revoked. The number of revocation hearings denied is the number of parolees who continued on parole following their parole revocation hearing and/or the revocation of their parole was deferred for various reasons.

No. of parole revocation hearings approved	No. of parole revocation hearings denied	No. of parole hearings rescheduled	Total no. of parole revocation hearings
145	45	67	257

Reasons for denial are the following:

- Space available for community programs (e.g. residential treatment, intensive outpatient treatment, Domestic Violence, Cognitive Skills)
- Pending charges dropped and/or acquitted.

8) The cost of incarceration per inmate, per day, per facility.

The estimated cost to house an inmate in Hawai'i in FY 2025 is $330 a day.

(9) Offender demographics, including gender, race, age, and type of offense.

See Attachment A

(10) The number of individuals who received vocational training or rehabilitation services and type of vocational training or rehabilitation services received.

There was a total of one thousand two hundred thirteen (1,213) Career and Technical Education (CTE) training program participants, seven hundred sixty (760) participants or 63% completed the programs. These account for participants in programs such as Carpentry Pre-Apprenticeship, Construction Trades- Carpentry and Plumbing, Forklift Operator certification, Forklift Simulation Training, ServSafe (Safety and Sanitation Manager's Certification), KCC Culinary Arts Program Certification, Yoga Teacher Training Certification, Landscaping Technician Certification, OSHA 10 Certification, Digital Literacy, Coursera courses, Keyboarding, Altino Coding, Career Foundations Curriculum for employability skills, LCC Entrepreneurship, Financial Literacy and Soft Skills.

The RCO continues to work to address rehabilitative service needs that exiting inmates face upon release. The RCO has initiated discussions with other agencies and community service providers to determine how to also address the mental health needs and continuum of care for a majority of inmates who are missing upon release.

The office is also working with DLIR and DCR Education Services Branch to inform and educate the other agencies of the need to develop work programs for inmates to increase success rates upon release and reduce the recidivism rate. The office is also working with the Hawai'i Correctional Industries (HCI) office to develop new products/programs to advance the skills of inmates while in custody and translate those skills into living wage job opportunities upon release.

11) The total number of inmate intakes, by month, including the number of intakes each month within the past year and past five years.

See Attachment B

(12) The total number of inmates released, by month.

See Attachment C

(13) The number of inmates with substance abuse problems, including the type of dependence and addiction, and the number of inmates with no reported substance abuse problems.

From November 1, 2024, through October 31, 2025, DCR recorded one thousand one hundred ninety-nine (1,199) assessments of which five hundred twenty (520) were screened/assessed for substance abuse problems using the Texas Christian University Drug Screen (TCUDS). The addiction severity for those assessed with the TCUDS are as follows:

No. of inmates screened	Assessment level
58	Low addiction severity/no treatment indicated
60	Mild addiction severity indicated/outpatient level of treatment services
78	Moderate addiction severity/intensive outpatient level of treatment
324	Severe addiction severity/residential treatment

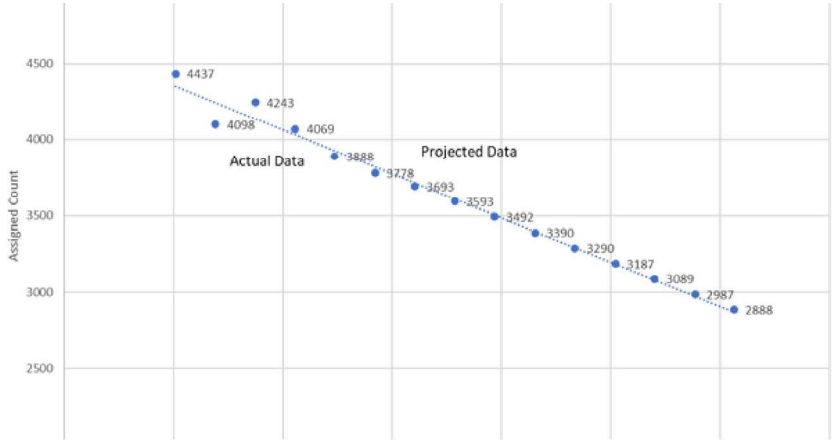

The number of inmates estimated to have no notable substance abuse problems by examination of available data is seven hundred ninety-five inmates (795).

(14) The median length of incarceration, excluding inmates who have received life sentences or been paroled.

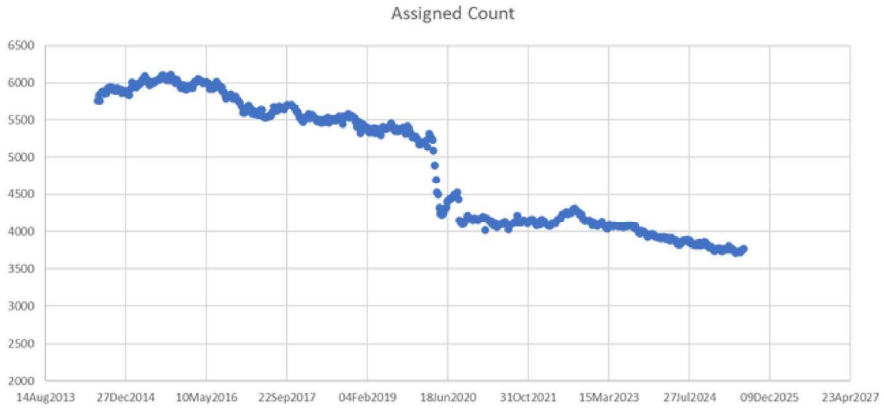

See Attachment D

(15) The prison population forecast for the next decade.

Assigned count from FY 2015 to FY 2025

The graph shows a large step down in population in 2020, which reflects the effects of COVID, and the Hawai'i Supreme Court. This large decrease in population precludes the use of pre-COVID population being used for projections.

•The data used for the projection were the assigned counts from the weekly population reports from FY 2020 through FY 2025
•The projection was done with a stepwise auto-regression model on all weekly data from the date range.
•The data points are the first Monday of each Fiscal Year.

(16) The total number of pretrial detainees and the number of pretrial detainees admitted each month by type of crime, bail amount, risk assessed, gender, race and age

See Attachement E

(17) The number of pretrial detainees released or discharged each month and the reason for the release or discharge by type of crime, bail amount, risk assessed, gender, race, and age.

See Attachment F

Note: 0=No assessed risk level due to incomplete assessment; 1=low risk; 2=moderate risk; 3=high risk.)

(18) The average length of stay for pretrial detainees by reason for release or discharge, type of crime, bail amount, risk assessed, gender, race, and age.

See Attachment G

(19) The number of pretrial detainees held on cash bail by type of crime, bail amount, risk assessed, gender, race, and age.

See the following graphs:

Pretrial detainees held on bail - Type of Crime

Type of Crime	PTF	PTM	Total
Other	586	984	1,570
