REPORT TO THE THIRTY-THIRD HAWAI`I LEGISLATURE
REGULAR SESSION OF 2026

In accordance with section 103F-107, Hawai`i Revised Statutes (HRS)
Annual Report on Medicaid Health Care Insurance Plan Contracts
Fiscal Year 2024-2025, (Revised)

Med-QUEST Division
DEPARTMENT OF HUMAN SERVICES
STATE OF HAWAI`I
APRIL 2026

This report is submitted in accordance with section 103F-107, Hawai`i Revised Statutes (HRS), which requires the Department of Human Services to submit an annual report regarding Hawai`i's Medicaid health care insurance plan contracts. This report provides an overview for State Fiscal Year 2024-2025 (SFY25). This is a revised report that replaces the report submitted to the Legislature by letter dated March 24, 2026. The report required updating as one of the health plans submitted its report after the March 24, 2026 report was submitted to the Legislature.

QUEST Integration

QUEST Integration (QI) is a State of Hawai`i (State) Department of Human Services (DHS) and Med-QUEST Division (MQD) comprehensive section 1115(a) Demonstration that expands Medicaid coverage to children and adults. The Demonstration created a public purchasing pool that arranges for health care delivery through contracted managed care health care insurance plans (Plan).

Under managed care, the State pays a capitation fee to contracted health care insurance plans for each QI beneficiary enrolled in the Plan. The Plans manage the delivery of QI benefits, services and supports to eligible beneficiaries based on medical necessity and clinical criteria. The Plans also pay providers for the beneficiary's Medicaid-covered services as required in the Plans' contract with the State. MQD works closely with the Plans to monitor contract implementation and compliance.

During SFY25, QI contracts were held by five health care insurance plans:

1. AlohaCare,
2. Hawai`i Medical Service Association,
3. Kaiser Foundation Health Plan, Inc.,
4. `Ohana Health Plan, and
5. UnitedHealthcare Community Plan.

These Plans are contracted to serve QUEST Integration Medicaid beneficiaries throughout the State of Hawai`i. The SFY started with approximately 432,222 QI beneficiaries. The SFY ended with approximately 400,920 QI beneficiaries. The decrease continues to follow a slow downward trend from peak Public Health Emergency (pandemic) enrollment level.

Financial Expenditures

For the SFY25 reporting period, Plans reported receiving a total of $2,611,983,914 in payments for contracted services. This is a 3% decrease over SFY24 payments of $2,682,231,291.

Medical services expenditures averaged 96.51% of total award (compared to 88% during SFY24 and 90% during SFY23).

Administrative expense ratios varied widely by Plan but were acceptable (below 15%) with an

overall average at 7.49% (comparable to 8% for SFY24 and SFY23).

Although Plans reported "Total Gain/Loss" dollar values, these point-in-time unaudited financials do not include capitation rate risk corridor outcomes which are necessary to reflect a complete gain/loss value. The rate risk corridors are typically not calculated until a year after the contract year ends.

Employment Information

For the SFY25 reporting period, Plans reported a combined total of 1,096.5 employees located in Hawai`i who support fulfillment of the QI contract requirements. (This is comparable to 1,082 employees for SFY24.)

State & Federal Sanction Proceedings, Prohibitions, Restrictions, and Ongoing Investigations

Plans reported a total of 18 cases (both active and closed). This count may include ongoing state or federal sanction proceedings, prohibitions, restrictions, and ongoing civil or criminal investigations. No adverse actions were reported.

Contributions

Each Plan has sole discretion to determine its contributions to the community. Contribution recipients and amounts varied significantly between Plans. No regulatory issues were identified.

Management and Administrative Contracts

For each reported contract, Plans provided the required data (e.g., contractor name, service description, and cost). Contract categories were recently introduced to promote reporting uniformity and potential comparative analysis. Meaningful comparative analysis remains challenging due to significant operational differences between Plans whereby some Plans contract for certain services and other Plans perform those services using non-contracted in-house resources.

REFERENCE: Section 103F-107, Hawai`i Revised Statutes

(1) Financial Expenditures listed are not intended to match audited financials or statutory filings. These numbers have been solely produced for the purpose of complying with the requirements of this report.

(2) Dollars received are revenue amounts received from the state to administer the QI program for SFY 2025. The amount represents capitation received and includes retroactivity through the November 2025 payment. The amount excludes certain state-directed payments, member cost share, and spend-down. The amount includes an estimate for expected payments to and from the state for risk share/corridor arrangements for ABD, Non-ABD/Non-Expansion, and Expansion. The estimated risk shering amounts are estimated as of November 2025 and are uniformly pro-rated to apply to the applicable period: July 2024 - June 2025. These risk shering estimates include Calendar Year Retroactive Settlement Corridor, High Cost Drug Corridor, High Risk Newborn Pool, Maternity Delivery Corridor, and Program aggregate gain/loss shares.

(3) The amount listed for medical services represents costs associated with medical service claims paid for service dates in SFY 2025 and paid through 11/30/2025. They exclude: IBNP of $2.1M, member cost share and spend-down. To get a true picture of medical cost, the IBNP amount of $2.1M should be added to the reported amount.
