
A BILL FOR AN ACT

RELATING TO RECYCLING.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that discarded mattresses
2 and box springs present a persistent and growing challenge to
3 Hawaii's solid waste management system. Each year, tens of
4 thousands of bulky mattresses are landfilled or illegally dumped
5 along roadsides, in gulches, and near streams, creating public
6 health hazards, fire risks, and visual blight.

7 Because mattresses are large, difficult to compact, and
8 often contain recyclable materials such as steel, foam, and
9 fiber, they take up disproportionate landfill space and increase
10 disposal costs for counties and taxpayers. The transportation
11 of bulky waste to landfills also increases greenhouse gas
12 emissions and strains already limited county budgets.

13 The legislature further finds that mattress materials can
14 be recovered and reused through recycling or renovation,
15 reducing the need for virgin materials, supporting local
16 recycling enterprises, and creating green-sector jobs. Other
17 states, including California, Connecticut, Oregon, and Rhode

1 Island, have established extended producer responsibility
2 programs that have diverted millions of mattresses from
3 landfills, reduced illegal dumping, and provided stable funding
4 through modest, transparent per-unit fees.

5 Accordingly, the purpose of this Act is to establish the
6 mattress stewardship program, which requires producers to
7 designate stewardship organizations to develop and implement
8 plans to ensure collection, reuse, donation, and recycling
9 opportunities for mattresses, box springs, and mattress
10 foundations.

11 SECTION 2. Chapter 342G, Hawaii Revised Statutes, is
