A BILL FOR AN ACT

RELATING TO COMMERCIAL AQUARIUM COLLECTION.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the capture and sale
2 of Hawaii's native reef wildlife for ornamental display and
3 commercial profit is unsustainable and contrary to Hawaiian
4 values, including malama aina, aloha aina, kuleana for the
5 surrounding environment, and pono fishing practices, such as
6 taking only what is needed for family or community subsistence.

7 The legislature further finds that the 1953 territorial
8 legislature, in enacting legislation to permit commercial
9 aquarium fish collection using fine-meshed nets, currently
10 codified in section 188-31, Hawaii Revised Statutes, ignored,
11 disregarded, and effectively nullified the many traditional uses
12 of Hawaiian reef fish by falsely stating that fish taken for
13 aquarium display have "little or no value as food fish," and
14 that "the species of fish for aquarium purposes is not edible".

15 The legislature recognizes that many species of fish
16 targeted by aquarium collection, including lauipala (yellow
17 tang) and kole (goldring surgeonfish), have in fact been used

1 for subsistence and cultural purposes and have been critical to
2 maintaining healthy reef ecosystems to support these purposes
3 since time immemorial, up to and including the present day.

4 The legislature also finds that climate change and
5 associated ecological shifts require the State to keep as many
6 native fish on the reef as possible. Abundant populations of
7 herbivorous reef wildlife can bolster reef resiliency against
8 the effects of climate change by consuming algae that bloom and
9 can smother reefs following ocean heat waves or changes in ocean
10 acidity. Reefs provide vital ecosystem benefits, reducing the
11 impact of extreme weather events and high surf by moderating
12 onshore erosion, protecting human infrastructure, and mitigating
13 harm to flora and fauna. Moreover, on-reef tourism activities,
14 including snorkeling and diving, are a vital part of Hawaii's
15 nature-based tourism economy, which is driven by healthy and
16 vibrant ecosystems.

17 The legislature notes that in 1988, the State prohibited
18 the taking of sand, dead coral or coral rubble, rocks, soil, and
19 other marine deposits. Extending these prohibitions to
20 encompass the commercial collection and sale of reef wildlife
21 for the aquarium pet trade is now necessary to protect and

1 conserve Hawaii's invaluable natural resources for present and
2 future generations, including traditional Native Hawaiian
3 cultural practices that depend on them. The legislature further
4 notes that these obligations and protections are enshrined in
5 article XI, sections 1 and 9, and article XII, section 7 of the
6 Constitution of the State of Hawaii.

7 Accordingly, the purpose of this Act is to prohibit the
8 capture and sale of aquatic life for commercial aquarium
9 purposes, regardless of the method of collection.

10 SECTION 2. Chapter 188, Hawaii Revised Statutes, is
11 amended by adding a new section to be appropriately designated
12 and to read as follows:

13 "§188- _____ Harvesting aquatic life for commercial aquarium
14 purposes; prohibition. (a) No person shall harvest aquatic
15 life from state marine waters for commercial aquarium purposes.
