
HOUSE CONCURRENT RESOLUTION

URGING THE COUNTY OF MAUI TO ADOPT ORDINANCES THAT ESTABLISH WILDLAND-URBAN INTERFACE SAFETY STANDARDS FOR PLANTATION TOWNS AND OTHER HIGH-RISK COMMUNITIES, TAKING INTO ACCOUNT THE COUNTY OF KAUAI'S ORDINANCE NO. PM-2025-425, RELATING TO THE PLANTATION CAMP DISTRICT WILDFIRE AND WILDLAND URBAN INTERFACE, AND OTHER STATE AND NATIONAL WILDLAND-URBAN INTERFACE BEST PRACTICES.

1 WHEREAS, national research has shown that the
2 wildland-urban interface has expanded substantially over time,
3 increasing the number of homes and communities exposed to
4 wildfires, ember intrusion, and structure-to-structure fire
5 spread; and

6
7 WHEREAS, states across the country have increasingly
8 responded to that expansion by adopting and amending codes and
9 ordinances to integrate home hardening, defensible space,
10 vegetation management, and wildfire risk mapping into local land
11 use and permitting decisions; and

12
13 WHEREAS, for example, California applies ignition-resistant
14 construction standards in designated fire hazard severity zones
15 and wildland-urban interface areas, Colorado has required
16 jurisdictions in wildland-urban interface areas to adopt codes
17 meeting or exceeding statewide minimum wildfire resiliency
18 standards, Utah jurisdictions have adopted wildland-urban
19 interface codes governing home hardening and vegetation
20 management, and Arizona law expressly authorizes municipalities
21 to adopt current wildland-urban interface codes; and

22
23 WHEREAS, in response to increasing wildfire risks, the
24 County of Kauai adopted Ordinance No. PM-2025-425 on
25 September 8, 2025, to advance wildfire mitigation in West
26 Kauai's Plantation Camp District; and
27

1 WHEREAS, the County of Kauai ordinance requires new and
2 substantially remodeled buildings within the Plantation Camp
3 District wildland-urban interface area to incorporate wildfire
4 risk reduction measures, including home hardening standards
5 intended to reduce ember intrusion, a noncombustible zone
6 immediately surrounding structures, defensible space around
7 structures, and vegetation maintenance extending farther from
8 structures; and
9

10 WHEREAS, the County of Kauai ordinance is significant
11 because it formally integrates wildfire safety into zoning,
12 permitting, and community design in a historic plantation town
13 setting, thereby offering a state-specific model for balancing
14 cultural preservation with modern fire safety; and
15

16 WHEREAS, the County of Maui likewise contains historic
17 country towns and plantation-era communities where the built
18 environment, road pattern, lot configuration, vegetation,
19 topography, and exposure to wind-driven fire can create
20 dangerous plantation town wildland-urban interface conditions;
21 and
22

23 WHEREAS, the County of Maui officially recognizes these
24 towns within its Country Town Business District framework, and
25 these communities provide useful examples of plantation town and
26 historic town conditions in which wildfire risk reduction
27 measures should be tailored to protect life, property, and
28 community character; and
29

30 WHEREAS, like Lahaina, many historic plantation towns, such
31 as Paia and Makawao, retain elements of the plantation past
32 while continuing to function as living town centers, making
33 these communities especially relevant examples when considering
34 wildfire safety standards for the County of Maui's plantation
35 town wildland-urban interface areas; and
36

37 WHEREAS, the 2023 Maui wildfires demonstrated with tragic
38 clarity that the County of Maui faces not only a wildland fire
39 threat, but also the threat of wildfire-driven urban
40 conflagration, as fire moved from surrounding wildland fuels
41 into Lahaina's neighborhoods and rapidly transformed into a
42 destructive urban firestorm; and

1
2 WHEREAS, the 2023 Maui wildfires resulted in catastrophic
3 loss of life, homes, businesses, and irreplaceable cultural and
4 historic resources, and awakened the State and the County of
5 Maui to the urgent need to modernize ordinances, codes, and land
6 use practices to reflect the reality that wildfire and urban
7 firestorm development can occur together in Hawaii communities;
8 and
9

10 WHEREAS, the County of Maui's continued wildfire planning
11 efforts would be strengthened by the adoption and enforcement of
12 county ordinances that expressly address plantation town
13 wildland-urban interface conditions through locally tailored
14 standards for ember-resistant construction, noncombustible zones
15 near structures, defensible space, vegetation management, access
16 and water supply considerations, and integration of wildfire
17 risk into planning, permitting, and redevelopment decisions;
18 now, therefore,
19

20 BE IT RESOLVED by the House of Representatives of the
21 Thirty-third Legislature of the State of Hawaii, Regular Session
22 of 2026, the Senate concurring, that the County of Maui is urged
23 to adopt ordinances that establish wildland-urban interface
24 safety standards for plantation towns and other high-risk
25 communities, taking into account the County of Kauai's Ordinance
26 No. PM-2025-425, relating to the Plantation Camp District
27 Wildfire and Wildland Urban Interface, and other state and
28 national wildland-urban interface best practices; and
29

30 BE IT FURTHER RESOLVED that in developing the requested
31 ordinances, the County of Maui is urged to consider standards
32 and procedures relating to ember-resistant and
33 ignition-resistant construction, noncombustible areas
34 immediately adjacent to structures, defensible space and
35 vegetation management requirements, wildfire risk mapping and
36 applicability thresholds, and the integration of wildfire
37 mitigation into zoning, permitting, redevelopment, and community
38 design review for historic and country town areas; and
39

40 BE IT FURTHER RESOLVED that the County of Maui is
41 encouraged to evaluate plantation town wildland-urban interface
42 conditions in its communities, and apply the lessons of the 2023

H.C.R. NO. 136

1 Maui wildfires to other communities in the County facing similar
2 wildfire and urban firestorm risks; and

3
4
5
6
7
8
9
10
11
12
13

BE IT FURTHER RESOLVED that certified copies of this Concurrent Resolution be transmitted to the Governor, Mayor of the County of Maui, Chair of the Maui County Council, Fire Chief of the Department of Fire and Public Safety of the County of Maui, Administrator of the Emergency Management Agency of the County of Maui, and Director of the Department of Planning of the County of Maui.
