
HOUSE CONCURRENT RESOLUTION

REQUESTING THE DEPARTMENT OF AGRICULTURE AND BIOSECURITY TO
CONVENE A WORKING GROUP TO IMPROVE CONSUMER AWARENESS OF
INVASIVE PLANT SPECIES, REDUCE THE SPREAD OF INVASIVE
SPECIES THROUGH PLANT SALES, AND CREATE A COMPREHENSIVE
LABELING FRAMEWORK THAT PROVIDES AN INDICATION OF A PLANT
SPECIES' INVASIVENESS RISK WHEN SOLD IN THE STATE.

1 WHEREAS, the introduction of invasive plant species into
2 Hawaii's ecosystem has serious environmental implications,
3 including degrading watershed integrity, accelerating erosion,
4 and decreasing biodiversity; and

5
6 WHEREAS, invasive plant species also contribute to
7 significant agricultural harm by causing crop destruction,
8 competing with crops for resources, creating fire hazards,
9 increasing costs, and reducing agricultural productivity; and

10
11 WHEREAS, approximately ninety percent of invasive plants in
12 Hawaii have been imported intentionally, primarily through
13 horticulture; and

14
15 WHEREAS, invasive plant species are sold within the State
16 and often unknowingly purchased by consumers, highlighting a
17 clear disconnect between consumer values and the information
18 currently available at the point of sale; and

19
20 WHEREAS, the list of plants designated by the Department of
21 Agriculture and Biosecurity as noxious weeds, which are
22 prohibited from import or sale in the State, was last updated in
23 1992; and

24
25 WHEREAS, the list contains species that are now widespread
26 and omits some invasive plant species that pose the highest
27 risks to the State; and

1
2 WHEREAS, the Plant Pono Program was created to help Hawaii
3 residents and members of the nursery industry make informed
4 decisions about plant purchases and sales and reduce the spread
5 of invasive species; and

6
7 WHEREAS, the Plant Pono Program provides a publicly
8 accessible website and resources that allow users to select
9 plants that are less likely to escape cultivation and harm
10 native forests, watersheds, agriculture, and biodiversity; and

11
12 WHEREAS, initiatives aimed at increasing awareness of
13 invasive plant species have been effective abroad, including in
14 New Zealand, which has implemented successful initiatives like
15 the Weedbusters Program and Great Weeds Hunt, which seek to
16 reduce the population of invasive plant species through public
17 education and community engagement; and

18
19 WHEREAS, despite this initiative, issues related to
20 invasive species persist, demonstrating the need for further,
21 collaborative efforts to raise consumer awareness about the
22 potential invasiveness of plants at a time and place when
23 consumers are making plant purchasing decisions; now, therefore,

24
25 BE IT RESOLVED by the House of Representatives of the
26 Thirty-third Legislature of the State of Hawaii, Regular Session
27 of 2026, the Senate concurring, that the Department of
28 Agriculture and Biosecurity is requested to convene a working
29 group to improve consumer awareness of invasive plant species,
30 reduce the spread of invasive species through plant sales, and
31 create a comprehensive labeling framework that provides an
32 indication of a plant species' invasiveness risk when sold in
33 the State; and

34
35 BE IT FURTHER RESOLVED that the Chairperson of the Board of
36 Agriculture and Biosecurity, or the Chairperson's designee, is
37 requested to serve as chairperson of the working group; and

38
39 BE IT FURTHER RESOLVED that the working group is requested
40 to invite a representative from each of the following
41 organizations to participate in the working group:
42
