
A BILL FOR AN ACT

RELATING TO TRANSIT ORIENTED DEVELOPMENT.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the best proven
2 models of successful, affordable, healthy, and vibrant
3 communities in transit-oriented development areas require
4 sufficient water, sewer, and power infrastructure; significant
5 affordable housing; safe, comfortable, and convenient pedestrian
6 and multi-modal transit connectivity; meaningful community
7 amenities such as parks, recreational facilities, and event
8 venues; and community programs that provide for culture, arts,
9 communication, safety, security, and cleanliness.

10 The legislature further finds that while significant effort
11 has been made to plan for and prioritize affordable housing in
12 transit-oriented development areas, too often the rest of the
13 community infrastructure, multi-modal connectivity, public
14 spaces, and amenities required for successful, livable
15 communities are not the top priority for any one department or
16 agency. As a result, these are often not planned for or
17 constructed, ending up an afterthought once people move in and

1 discover the gaps in their quality of life. This results in
2 communities that are often sufficient for transient investment
3 units and vacation properties, but not best suited for local
4 families and permanent residents. Inevitably, this leads to
5 costly retrofits, inferior community amenities, and diminished
6 quality of life.

7 The legislature also finds that the two highest costs
8 contributing to the cost of living are housing and
9 transportation. By broadening the State's focus to develop
10 affordable communities with fully built community infrastructure
11 and amenities, rather than just affordable housing, the cost of
12 a single unit can be reduced by as much as \$75,000, and the cost
13 of transportation for families living there can be reduced by
14 \$15,000 or more per year.

15 Units in many recent housing projects have become
16 prohibitively expensive. On average, about \$50,000 is added to
17 the cost of a unit per parking stall built for it, and as much
18 as \$25,000 per unit for building amenities. Numerous cities
19 have begun separating and aggregating parking stalls and
20 building amenities, lowering the cost of each unit produced by
21 as much as \$75,000.

1 The legislature further finds that building separate
2 parking garages allows residents in an area to lease space or
3 use a parking stall as may be needed, rather than having the
4 cost forced upon them through their mortgage. This is important
5 considering Hawaii's next generation is driving considerably
6 less than previous generations. Since 2000, the percentage of
7 eighteen- to twenty-nine-year-olds with a driver's license has
8 plummeted nearly forty per cent. Many desire to live in
9 walkable, bikeable communities where they can get around without
10 the average costly expense of \$10,000 per year for each
11 additional car in a family.

12 Additionally, relieving housing developers of the burden of
13 building excessive amenities and gathering spaces in each
14 building lowers the cost of living. Aggregating public spaces
15 for open plazas, gathering spaces, parks, and green spaces
16 available to everyone creates and fosters a better sense of
17 community and opportunities for better mixed-use commercial,
18 retail, and food options at a lower overall cost.

19 The legislature believes that tasking an agency with a
20 primary mission to prioritize, plan, and build community
21 infrastructure and amenities such as parks, public spaces,

1 markets, and other amenities that make communities livable,
2 desirable, and lower the cost of living should be a priority,
3 not an afterthought. This approach, utilized by countless
4 successful jurisdictions around the country and world, can
5 reduce the cost of living, and, equally importantly, improve the
6 quality of life and mental health and well-being for residents
7 of all ages.

8 The legislature additionally finds that incorporating
9 mixed-use commercial and retail space into the ground floors of
10 buildings not only puts daily needs within walking distance of
11 residents, but also provides lease rent and revenue generating
12 opportunities that can help pay for maintenance, security, and
13 similar expenses to lower maintenance fees and cost of living
14 for residents in each building by thousands of dollars per year.

15 The legislature notes that some state agencies, such as the
16 Hawaii housing finance and development corporation and Hawaii
17 public housing authority, have a primary focus on building
18 affordable communities, and other agencies, such as the Hawaii
19 community development authority, have a broad focus on urban
20 planning and development, but must compromise between achieving
21 numerous goals, often leaving critical community amenities and

1 infrastructure unfulfilled. Currently, no agency is tasked with
2 a primary mission to plan for and construct the rest of the
3 community infrastructure and amenities necessary to fill the
4 gaps in recent development projects to ensure communities are
5 being planned and built from the start with the public spaces,
6 safe connectivity, and everything else the public tends to
7 desire and need to reduce the cost of living, improve the
8 quality of life, and ensure that affordable communities end up
9 as more than transient investment or vacation properties, but
10 rather as an ideal home for local residents to live, work, and
11 play within.

12 Accordingly, the purpose of this Act is to establish the
13 transit-oriented community improvement partnership, with a
14 primary focus on prioritizing and implementing the community
15 improvements and amenities desired by local residents necessary
16 for affordable, healthy, and vibrant communities. The
17 partnership shall:

18 (1) Coordinate with transit-oriented community development
19 agencies and other stakeholders to ensure communities
20 are planned and built with full transit

1 infrastructure, communities, amenities, and workforce
2 housing needed for success;

3 (2) Build community infrastructure, amenities, and address
4 other needs to lower the cost of living and improve
5 the quality of life; and

6 (3) Establish programs that communities desire, such as
7 community and business improvement districts, to
8 promote community engagement, keep public spaces safe
9 and clean, and provide better opportunities and
10 pathways for local economic development.

11 SECTION 2. The Hawaii Revised Statutes is amended by
