A BILL FOR AN ACT

RELATING TO PROCUREMENT.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that, even when state
2 buildings are designed to operate efficiently, building
3 materials can carry significant greenhouse gas emissions
4 associated with extraction, processing, manufacturing,
5 transportation, installation, maintenance, and end-of-life
6 treatment. National and international analyses commonly
7 attribute approximately one-tenth of annual global emissions to
8 building materials and construction activities.

9 The legislature further finds that the State's procurement
10 practices can support transparency and better public decision-
11 making by ensuring that standardized, comparable environmental
12 information is disclosed for construction products used in state
13 construction projects. Environmental product declarations are
14 standardized life cycle disclosures for construction products
15 developed pursuant to internationally recognized standards
16 including ISO 21930, established by the International
17 Organization for Standardization.

1 Accordingly, the purpose of this Act is to require the
2 submission and retention of environmental product declarations
3 for building materials used in state construction projects to
4 enable the collection of consistent data.

5 SECTION 2. Chapter 103D, Hawaii Revised Statutes, is
6 amended by adding a new section to part IV to be appropriately
7 designated and to read as follows:

8 "§103D- Environmental product declaration; submission
9 requirement for state construction projects. (a) The
10 procurement practices of the State for state construction
11 projects shall include a requirement for the submission of
12 environmental product declarations for building materials
13 incorporated into the project.

14 (b) The purchasing agency shall require, as part of the
15 contract administration process for each state construction
16 project, that the contractor submit to the purchasing agency
17 environmental product declarations for the building materials
18 incorporated into the project, including the climate change
19 potential values reported in those declarations.

20 (c) The purchasing agency shall notify offerors and
21 contractors of the information, procedures, and forms, if any,

1 required to submit environmental product declarations required
2 under this section.

3 (d) Environmental product declarations submitted pursuant
4 to this section shall be collected and retained as procurement
5 records in accordance with section 103D-320."

6 SECTION 3. Section 103D-104, Hawaii Revised Statutes, is
7 amended by adding two new definitions to be appropriately
8 inserted and to read as follows:

9 "Climate change potential" means a measure of the relative
10 contribution of a greenhouse gas or a set of greenhouse gases to
11 warming, expressed as a carbon dioxide equivalent, as reported
12 in an environmental product declaration.

13 "Environmental product declaration" means a standardized
14 report that transparently quantifies a product's environmental
15 impacts across its life cycle, from raw material extraction to
16 end-of-life, based on a life cycle assessment, and developed in
17 accordance with the ISO 21930, established by the International
18 Organization for Standardization or a successor standard."

19 SECTION 4. Section 103D-320, Hawaii Revised Statutes, is
20 amended to read as follows:

1 "§103D-320 Retention of procurement records; evaluations.
2 All procurement records shall be retained and disposed of in
3 accordance with chapter 94 and records retention guidelines and
4 schedules approved by the comptroller. Written past performance
5 evaluations for all procurements over the small purchase
6 threshold shall be maintained in the processing department's
7 procurement files and in the statewide past performance
8 database. Procurement records for state construction projects
9 shall include any environmental product declarations submitted
10 pursuant to section 103D- ."

11 SECTION 5. New statutory material is underscored.

12 SECTION 6. This Act shall take effect on July 1, 2026.
