

MAR 16 2026

SENATE CONCURRENT RESOLUTION

RECOGNIZING THE PUBLIC HEALTH IMPACTS OF AIR POLLUTION FROM
INTERNAL COMBUSTION ENGINE VEHICLES AND THE RISKS THAT
TRAFFIC-RELATED AIR POLLUTION POSES TO COMMUNITIES ACROSS
THE STATE AND AFFIRMING THE COMMITMENT TO TRANSITION TO
CLEANER TRANSPORTATION CHOICES.

1 WHEREAS, Hawaii is fortunate to generally experience good
2 air quality compared to many other parts of the United States;
3 and
4

5 WHEREAS, statewide or regional air quality measurements do
6 not always capture localized or micro-scale pollution impacts
7 that may occur when individuals live, work, or attend school
8 near sources of air pollution, such as heavily traveled roadways
9 or areas with concentrated transportation activity; and
10

11 WHEREAS, internal combustion engine vehicles contribute to
12 a significant amount of air pollution, including emissions of
13 nitrogen oxides, particulate matter, carbon monoxide, volatile
14 organic compounds, and other pollutants that can harm human
15 health; and
16

17 WHEREAS, scientific research has demonstrated that exposure
18 to traffic-related air pollution is associated with a range of
19 adverse health outcomes, including asthma, chronic respiratory
20 symptoms, reduced lung function, impaired lung development in
21 children, decreased cognitive function, cardiovascular disease,
22 stroke, and premature death; and
23

24 WHEREAS, epidemiologic evidence from places like New York's
25 South Bronx "Asthma Alley", as well as extensive research in
26 California and inner-cities across the United States, has linked
27 proximity to traffic-related air pollution to asthma,
28 cardiovascular disease, and other adverse health outcomes; and

1
2 WHEREAS, children, older adults, and individuals with
3 existing respiratory or cardiovascular conditions are
4 particularly vulnerable to the health effects of air pollution;
5 and

6
7 WHEREAS, internal combustion engine vehicle-related air
8 pollution can infiltrate homes, schools, and other buildings,
9 meaning that residents may experience exposure to pollution
10 indoors as well as outdoors; and

11
12 WHEREAS, research has demonstrated that lower-income
13 communities and communities that already experience
14 environmental health burdens are more likely to be located near
15 major roadways and other sources of pollution; and

16
17 WHEREAS, climate change intensifies the health impacts of
18 traffic-related air pollution, as warmer temperatures increase
19 the production of ground-level ozone and fewer trade wind days
20 lead to less natural ventilation and dispersal of air
21 pollutants; and

22
23 WHEREAS, understanding the public health impacts of
24 traffic-related air pollution is important for informing
25 policies that protect public health and reduce pollution from
26 transportation sources; and

27
28 WHEREAS, the people of Hawaii have a right to understand
29 how traffic-related air pollution affects the health of their
30 families and communities; now, therefore,

31
32 BE IT RESOLVED by the Senate of the Thirty-third
33 Legislature of the State of Hawaii, Regular Session of 2026, the
34 House of Representatives concurring, that this body recognizes
35 the public health impacts of air pollution from internal
36 combustion engine vehicles and the risks that traffic-related
37 air pollution poses to communities across the State; and

38
39 BE IT FURTHER RESOLVED that this body acknowledges that
40 certain communities, including those located near major roadways
41 and areas with concentrated transportation activity, as well as
42 vulnerable populations such as children, older adults, and

1 individuals with existing health conditions, may experience
2 disproportionate exposure to harmful air pollution caused by
3 internal combustion engine vehicles; and
4

5 BE IT FURTHER RESOLVED that this body recognizes that these
6 impacts may intersect with socioeconomic inequities and
7 environmental justice concerns, including the disproportionate
8 burdens that may fall on lower-income communities; and
9

10 BE IT FURTHER RESOLVED that this body affirms its
11 commitment to policies that reduce pollution from transportation
12 sources and supporting the transition toward cleaner
13 transportation choices that protect public health, improve air
14 quality, and promote more equitable outcomes for the people of
15 Hawaii; and
16

17 BE IT FURTHER RESOLVED that certified copies of this
18 Concurrent Resolution be transmitted to the Governor, Director
19 of Transportation, Chairperson of the Public Utilities
20 Commission, and Chief Energy Officer of the Hawaii State Energy
21 Office.
