HB1523,HD1
RELATING TO STATEWIDE TRAFFIC CODE

House Committee on Judiciary & Hawaiian Affairs

The Hawaii Department of Transportation (HDOT) opposes HB1523, HD1.

This bill amends Section 291C-33 of the Hawaii Revised Statutes (HRS) to remove references to countdown timers as it relates to pedestrian-control signals, including the requirement that pedestrians must begin crossing a roadway before a countdown timer begins. The existing language in Section 291C-33 of the HRS regarding pedestrian countdown timers provides clarity by establishing that a pedestrian shall finish crossing a roadway but shall not begin crossing a roadway during the countdown. Eliminating references to countdown timers may result in pedestrians being unsure of their responsibilities in a crosswalk that operates a pedestrian-control signal with countdown timer.

HDOT understands that under the changes H.B. No. 1523 proposes, pedestrians would still be prohibited from crossing a roadway during the countdown, which coincides with flashing the "Don't Walk" or "Upraised Palm" signal. However, HDOT would oppose the intent of this bill if it is to permit pedestrians to begin crossing during this phase for the following reasons:

- Allowing pedestrians to start to cross a roadway during the countdown would introduce the potential for pedestrians to make individual decisions that create unpredictable situations. This unpredictability could disrupt safety and efficiency, leaving other road users to navigate scenarios they may not anticipate but remain responsible for.
- Pedestrians crossing the street against nationally established traffic control devices and contrary to other road user expectations would be challenging especially for children and elderly persons, our most vulnerable road users. A pedestrian may mistakenly believe it is safe to cross the roadway, or dart in front of a turning vehicle as they rush to cross the street before conflicting vehicular traffic proceeds. Such decisions force drivers into sudden, unanticipated situations that could have devastating consequences.

There were 148 pedestrian fatalities and 495 serious injuries from 2021 through 2025, using preliminary data for 2025. Pedestrians aged 17 and younger or aged 65 and older were involved in 42 percent of pedestrian fatalities and 34 percent of pedestrian serious injuries. Overall, pedestrians accounted for 28 percent all traffic fatalities and 20 percent of all serious injuries during this period. Ensuring predictability for all roadway users is essential for safe interactions between pedestrians and vehicles, and advancing the State's goal of eliminating traffic-related fatalities and serious injuries.

Thank you for the opportunity to provide testimony.

**Testimony COMMENTING on H.B. 1523, H.D. 1
RELATING TO THE STATEWIDE TRAFFIC CODE**

REPRESENTATIVE DAVID A. TARNAS, CHAIR
HOUSE COMMITTEE ON JUDICIARY AND HAWAIIAN AFFAIRS

Hearing Date: February 26, 2026
2:00 PM

Room Number: Conference Room 325
via Videoconference

1 **Fiscal Implications:** None

2 **Department Position:** The Department of Health (DOH) provides comments on House Bill
3 1523, House Draft 1 (H.B. 1523, H.D. 1), which removes references to countdown timers as it
4 relates to pedestrian-control signals including the requirement that pedestrians must begin
5 crossing a roadway before a countdown timer begins.

6 **Department Testimony:** This measure represents a practical and essential modernization of
7 Hawaii's traffic laws by removing unnecessarily burdensome regulations that prioritize technical
8 compliance over actual public safety. Currently, HRS §291C-33 prohibits pedestrians from
9 entering a crosswalk once a countdown timer has begun, a rule that accounts for approximately
10 46 percent of pedestrian citations.¹ This allows for the issuance of \$130 "jaywalking" tickets to
11 individuals who are behaving reasonably and have ample time to reach the other side of the
12 street safely. Rather than promoting safety, these overly technical regulations criminalize
13 ordinary behavior and turn informational safety tools into enforcement traps. By treating the

¹ Seitz A. Freedom to walk: decriminalizing jaywalking and shifting investment towards safe, accessible pedestrian infrastructure. Hawai'i Appleseed Center for Law and Economic Justice. March 2024. Accessed February 10, 2026. <https://hiappleseed.org/publications/freedom-to-walk>

1 countdown as a strict "do not enter" signal, the current law fails to provide pedestrians with the
2 data needed to make informed decisions based on their own walking speed and mobility needs.

3 Removing these barriers would increase safe access to physical activity and support
4 public health. Despite Hawaii's favorable climate, geography, and reputation for active outdoor
5 living, only 33% of adult and 18% of high school students in Hawaii met federal guidelines for
6 physical activity.^{2,3} A community's built environment can either promote or hinder this activity;
7 by decriminalizing the act of entering a crosswalk during a countdown, we create a more
8 accessible and walkable environment that supports those at risk for chronic diseases such as
9 obesity and heart disease. Aligning our statutes with best practices such as in San Francisco⁴
10 ensures that our infrastructure serves its intended purpose: to facilitate safe, efficient, and
11 equitable movement for all residents, including seniors and those with disabilities, without the
12 threat of avoidable and punitive citations.

13 **Offered Amendments:** None

14 Thank you for the opportunity to testify on this measure.

Testimony of the Oahu Metropolitan Planning Organization

Committee on Judiciary and Hawaiian Affairs

February 26, 2026 at 2:00PM

Conference Room 325

HB 1523 HD 1

Relating to Transportation

Dear Chair Tarnas, Vice Chair Poepoe, and Committee Members,

The Oahu Metropolitan Planning Organization (OahuMPO) **supports HB 1523 HD 1**, which removes references to countdown timers as it relates to pedestrian-control signals, including the requirement that pedestrians must begin crossing a roadway before a countdown timer begins.

This bill is consistent with several goals of the Oahu Regional Transportation Plan including support for active and public transportation, promoting an equitable transportation system, and improving air quality and protecting environmental and cultural assets.¹ Removing the requirement that pedestrians must begin crossing a roadway before a countdown timer begins, makes walking a less hostile form of transportation encourages more people to walk or roll to their destination.

Although the law that makes it illegal for pedestrians to step into the street once the clock starts counting down was passed to address pedestrian safety, pedestrian deaths have increased since the law's passing. Hawai'i road deaths hit an 18-year peak, with a spike in pedestrian and motorcycle deaths contributing to the more than 20% increase in deaths compared to 2024.²

The Federal Highway Administration lists proven safety countermeasures that have shown to reduce pedestrian crashes, hospitalizations, and deaths.³ Some examples include pedestrian medians or refuges, road diets, leading pedestrian intervals, and rectangular rapid flashing beacons. In addition to passing this law, proven safety countermeasures can be implemented systemically to truly improve pedestrian safety.

³ [Proven Safety Countermeasures | FHWA \(dot.gov\)](#)

The OahuMPO is the federally designated Metropolitan Planning Organization (MPO) on the island of Oahu responsible for carrying out a multimodal transportation planning process, including the development of a long-range (25-year horizon) metropolitan transportation plan, referred to as the Oahu Regional Transportation Plan (ORTP), which encourages and promotes a safe and efficient transportation system to serve the mobility needs of people and freight (including walkways, bicycles, and transit), fosters economic growth and development, and takes into consideration resiliency needs, while minimizing fuel consumption and air pollution ([23 CFR 450.300](#)).

Thank you for the opportunity to provide testimony on this measure.

TESTIMONY IN OPPOSITION OF HB1523 HD1

Senate Committee on Judiciary Hearing: February 26, 2026

Position: OPPOSE

To Rep David Tarnas, Chair, Rep Mahina Poepoe, Vice Chair, and representatives:

The Keiki Injury Prevention Coalition Keiki to Kupuna Program, in partnership with Walk Wise Hawaii, educates the public on pedestrian and bicycle safety as well as driver awareness.

We submit this testimony in **Opposition to HB 1523**, which removes references to countdown timers as it relates to pedestrian-control signals, including the requirement that pedestrians must begin crossing a roadway before a countdown timer begins.

Ensuring predictability for all roadway users is essential for safe interactions between pedestrians and vehicles, and advancing the State's goal of eliminating traffic-related fatalities and serious injuries. We would recommend looking into other mechanisms of improving pedestrian safety, and improving predictability for drivers to anticipate pedestrians, such as leading pedestrian intervals and pedestrian scrambles where appropriate.

Thank you for the opportunity to provide testimony on this measure.

Sincerely,

Lisa Dau, RN

Injury Prevention Coordinator

Keiki Injury Prevention Coalition

Testimony in Support for HB1523 - Relating to the Statewide Traffic Code
Committee on Judiciary & Hawaiian Affairs (JHA)
Thursday, February 26, 2026 at 2:00PM

Dear Chair Tarnas, Vice Chair Poepoe, and members of the JHA committee, Mahalo for the opportunity to **testify in STRONG SUPPORT of HB1523**, which would amend Section 291C-33, Hawaii Revised Statutes, would remove reference to countdown timers, including the requirement that pedestrians must begin crossing a roadway before a countdown timer begins.

HB1523 represents a practical and important step toward reducing unnecessarily burdensome pedestrian regulations that do not improve safety and instead contribute to confusing rules and avoidable citations. As Hawai'i Appleseed's research demonstrates, Hawai'i relies heavily on pedestrian enforcement—issuing more than 30,000 jaywalking-related citations between 2018 and 2023—without evidence that this approach reduces pedestrian injuries or fatalities.¹

Roughly 46 percent of these citations were given for violating HRS§291C-33,² which prohibits pedestrians from crossing on the Don't Walk Sign or against the Countdown Timer. Under these laws, **pedestrians can receive a \$130 jaywalking ticket for crossing the street after the countdown timer has started**, even if they have ample time to cross. Rather than promoting safety, these overly technical pedestrian regulations criminalize ordinary, reasonable behavior.

Pedestrian countdown signals were not designed to prohibit people from entering a crosswalk once the countdown begins. According to national best practices, including guidance used by cities like San Francisco, countdown timers exist to provide pedestrians with additional information—specifically, how much time remains to safely cross the street.³ These signals help people make informed decisions based on their walking speed, mobility needs, and comfort level. Treating the countdown as a strict “do not enter” signal misinterprets its purpose and turns a safety tool into an enforcement trap.

This misinterpretation disproportionately impacts seniors, people with disabilities, parents with children, and others who may need more time to cross. It also increases the likelihood that pedestrians will rush into crossings or avoid signalized intersections altogether—outcomes that undermine, rather than enhance, safety.

¹ Seitz, A, “Freedom to Walk: Decriminalizing Jaywalking and Shifting Investment Towards Safe, Accessible Pedestrian Infrastructure,” Hawai'i Appleseed Center for Law and Economic Justice, March, 2024.

RE: Support for HB 1523 HD1, Relating to the Statewide Traffic Code

Hrg: February 26, 2026 at 2:00 PM in Conference Room 325

Hawai'i Public Health Institute (HIPHI)¹ and the Healthy Eating + Active Living² (HEAL) Statewide Coalition are in **support of HB 1523 HD1**, which indicates the permitted actions at crosswalks .

This bill takes an important step toward allowing pedestrians freedom to safely cross at designated crosswalks regardless of time remaining during the walk cycle.

Removing Timers Increases Safety and Promotes Active Lifestyles

Removing the language surrounding the use of the countdown timers at designated crosswalks allows pedestrians to utilize the entire walk cycle to cross the street safely and efficiently. Additionally, following the direction of the simple walk/don't walk designations streamlines decision making for the pedestrian. Removing calculations from pedestrians can help increase safe actions.

Drivers Show Decreased Speeds Without Timers

Removing timers also provides clear direction to motorists to maintain a holding pattern as they may use the timers to anticipate signal changes, either accelerating to clear an intersection or gauging whether they can safely proceed.³ Decreased vehicle speed in intersections can help reduce collisions, providing increased safety for all pedestrians.

¹ Hawai'i Public Health Institute's mission is to advance health and wellness for the people and islands of Hawai'i. We do this through expanding our understanding of what creates health of people and place, fostering partnerships, and cultivating programs to improve policies, systems, and the environments where people live, learn, work, age, and play.

²The Healthy Eating + Active Living (HEAL) Coalition, formerly known as the Obesity Prevention Task Force, was created by the legislature in 2012 and is comprised of over 60 statewide organizations. The HEAL Coalition works to make recommendations to reshape Hawai'i's school, work, community, and health care environments, making healthier lifestyles obtainable for all Hawai'i residents.

³ Safe Systems Solutions.(2025, January 21). *Safe System Snippet 411: Pedestrian countdown timers - benefits and challenges*.

<https://safesystemsolutions.com.au/safe-system-snippet-411-pedestrian-countdown-timer-s-benefits-and-challenges/>

This change to the statewide traffic code will allow pedestrians to move freely and safely across the street at any time during the walk cycle to access vital services, employment, and recreational opportunities.

HIPHI and the HEAL coalition support HB 1523 HD1 and respectfully ask the committee to pass this measure.

Mahalo,

HOUSE COMMITTEE JUDICIARY & HAWAIIAN AFFAIRS
Thursday - February 26, 2026 - 2:00PM

Hawai'i Bicycling League Supports HB 1523, Relating to Statewide Traffic Code

Aloha Chair Tarnas, Vice Chair Poepoe, and Members of the Committee,

My name is Eduardo Hernandez and I am the Advocacy Director of the Hawai'i Bicycling League (HBL). We are a non-profit organization founded in 1975 with the mission of enabling more people to ride bicycles for health, recreation, and transportation. We strive to create communities across our islands that have safe, accessible, and inclusive environments for people to bike, walk, and roll.

HBL supports HB 1523 which would amend Section 291C-33, HRS and remove reference to countdown timers, including the requirement that pedestrians must begin crossing a roadway before a countdown timer begins.

Given that 2025 was one of the deadliest years in decades on Hawai'i roads, it is imperative to take bold action to influence public behavior change and raise awareness about road safety for all road users, especially vulnerable users, including pedestrians. This is aligned with Vision Zero principles which have been adopted by the State and the Counties. It also supports creating walkable communities and Honolulu's 2026 Charter Amendment for a more bike- and pedestrian-friendly city.

HB1523 represents a practical and important step toward reducing unnecessarily burdensome pedestrian regulations that do not improve safety and instead contribute to confusing rules and avoidable citations. Pedestrian countdown signals were not designed to prohibit people from entering a crosswalk once the countdown begins. According to national best practices, including guidance used by cities like San Francisco, countdown timers exist to provide pedestrians with additional information – specifically, how much time remains to cross the street.¹

HBL urges you to support this bill as a common sense reform that improves clarity, fairness, and safety for pedestrians. Mahalo for your time and consideration.

S/Eduardo Hernandez

Comments:

I am writing in strong support of HB No. 1523 HD 1. The purpose of the crosswalk countdown is to give the pedestrian enough information for them to decide whether, under their known capacity, they can cross the road within the remaining time or not. Instead, this helpful purpose has been subverted to become an easy way to make money by slapping on a large fine on pedestrians whether or not they are making a safe choice. Perhaps it is simply easier for the police to start writing the citation when the countdown timer starts, but if the purpose of this regulation is to ensure safe street crossing, surely the ticket-writing should not start until it is clear that the pedestrian has failed to clear the road in time.

Someone who can accurately gauge their ability to cross the street should not be penalized if there is no actual impediment to traffic or danger to themselves.

Please pass this common sense bill.

HB-1523-HD-1

Comments:

Aloha Chair, Vice Chair, and members of the committee,

I am testifying in strong support of HB1523, which removes the unreasonable requirement that a pedestrian must begin crossing a roadway *before* a countdown signal begins. This common-sense change modernizes our traffic code to reflect how people actually walk and removes a trap that currently allows for a \$130 fine for a harmless action.

The data shows this punitive approach is not working. Hawai'i issues thousands of these tickets annually without corresponding improvements in pedestrian safety. The law, as written, prioritizes technical compliance over the real-world goal of allowing people to cross the street safely and completely.

This bill aligns with the national movement toward "safe crossing" laws and removes an arbitrary and confusing rule that serves primarily as a revenue source, not a safety measure.

I urge you to pass HB1523 to make our streets more logical, more humane, and ultimately safer for everyone.

Mahalo for the opportunity to testify.

Submitted By	Organization	Testifier Position	Testify
Scott Smart	Individual	Support	Written Testimony Only

Comments:

I SUPPORT HB1523 HD1.

The Manual for Uniform Traffic Control Devices (MUTCD) Chater 4E defines a "pedestrian change interval" during which a pedestrian can complete a crossing based on an assumed walking speed of 3.5 feet per second. The MUTCD specifies that the pedestrian change interval have a visual signal of a red flashing upraised palm AND a countdown timer. The countdown timer is intended as an informational device, not a control device (the red flashing upraised palm does that).

As a result, HRS 291C-33(2) is the controlling section and 291C-33(3) adds nothing to it. Removing 291C-33(3) does not change the ability to cite pedestrians who enter the crosswalk during the pedestrian change interval (red flashing upraised palm), with or without the countdown timer.
