Testimony in SUPPORT of HB2459 HD1
RELATING TO THE FOOD AND PRODUCT INNOVATION NETWORK

REPRESENTATIVE SCOT Z. MATAYOSHI, CHAIR
HOUSE COMMITTEE ON CONSUMER PROTECTION AND COMMERCE

Hearing Date, Time and Room Number: 02/18/2026, 2:00 pm, 329

1 **Fiscal Implications:** The Department of Health (“Department”) requests that this measure be
2 considered so long as it does not supplant the priorities and requests outlined in the Governor’s
3 executive budget request.

4 **Department Position:** The Department supports HB2459 HD1.

5 **Department Testimony:** The Environmental Health Services Division, Food and Drug Branch
6 (“EHSD-FDB”) provides the following testimony on behalf of the Department:

7 HB2459 HD1 strengthens the Hawai’i Food and Product Innovation Network (“FPIN”)
8 through adopting statutes to refine governance and integration among key state agencies, sets
9 forth key performance indicators, and increases market access, branding alignment, and growth
10 opportunities for Hawai’i businesses. HB2459 HD1 builds upon the framework established by
11 Act 237, Session Laws of Hawaii (“SLH”) 2025.

12 The mission of the Department is to protect and improve the health and environment
13 for all people in Hawai’i. Investing in the FPIN, which will increase access to local, safe, and
14 nutritious foods, supports the Department’s mission. Access to safe and nutritious food is a
15 social determinant of health and the Department notes that both physical and mental health
16 outcomes improve when healthy food options are available to the public for consumption.

1 The Department appreciates the continued opportunity to participate in the FPIN,
2 primarily through its food regulatory programs. By working together with sister agencies, the
3 Department has been able to educate local manufacturers on food safety regulations up front.
4 Continued coordination will be critical as the industry evolves and new technologies emerge.

5 The Department defers to the Agribusiness Development Corporation (“ADC”) as to the
6 implementation and substantive matters of this measure. However, the Department is ready
7 and willing to partner with ADC and other agencies identified in this measure to incorporate a
8 coordinated food safety and regulatory framework to ensure that food products developed
9 through the FPIN are safe and comply with the Department’s food safety and food
10 manufacturing regulations.

11 **Offered Amendments:** None.

12 Thank you for the opportunity to testify on this measure.

Statement of
JAMES KUNANE TOKIOKA
Director
Department of Business, Economic Development, and Tourism
before the
HOUSE COMMITTEE ON CONSUMER PROTECTION & COMMERCE

Wednesday, February 18, 2026
2:00 PM
State Capitol, Conference Room 329

In consideration of
HB2459, HD1
RELATING TO THE FOOD AND PRODUCT INNOVATION NETWORK.

Chair Matayoshi, Vice Chair Grandinetti, and Members of the Committee,

The Department of Business, Economic Development & Tourism (DBEDT) strongly supports HB2459, HD1.

This measure strengthens the statutory framework for the Food and Product Innovation Network (FPIN) and directly advances Hawai'i's long-term economic diversification strategy outlined in Redesigning Hawai'i's Economy for Resilience.

Hawai'i's economy remains highly concentrated and vulnerable to external shocks. DBEDT's statewide strategy calls for a structural shift toward value-added manufacturing, export-oriented growth, workforce alignment, and regional production hubs that reduce import dependence and increase economic resilience.

HB2459, HD1 provides the operational structure needed to move FPIN from a set of facilities into a coordinated statewide economic system.

DBEDT's framework for economic resilience integrates four core pillars:

- 1) Curriculum-to-career pathways
- 2) Infrastructure and facilities
- 3) Policy alignment, and
- 4) Layered incentives.

HB2459, HD1 directly advances all four.

1. Infrastructure & Facilities → From Pilot to Commercial Scale

DBEDT's strategy identifies a major gap between early-stage production and commercial-scale manufacturing, the "valley of death" where businesses fail due to lack of compliant facilities, equipment, and support systems. FPIN sites are designed to bridge this gap.

HB2459, HD1 strengthens this role by requiring:

- Integrated food safety and regulatory frameworks
- Technical assistance for labeling, testing, and certification
- Coordination with DOH, CTAHR, and regulatory agencies

This ensures FPIN facilities are not just kitchens, but industry-ready commercialization platforms.

2. Workforce Alignment - Embedding Compliance and Industry Skills

DBEDT's resilience model connects education, training, and industry through cradle-to-career pathways. HB2459, HD1 embeds regulatory compliance and food safety education into workforce programs offered through the network.

This links FPIN to:

- CTE programs
- Community college pathways
- Industry-recognized credentials, and
- Strengthens workforce readiness in value-added food manufacturing – a priority sector for diversification.

3. Export & Market Access – Shifting Hawai'i Toward Value-Add Growth

DBEDT's strategy emphasizes that future growth must come from export-oriented value-added sectors, not just local consumption.

HB2459, HD1 requires ADC to develop a coordinated market access strategy with:

- Transportation
- Tourism
- Airlines and harbors
- Logistics providers

This connects production to distribution, tourism channels, and international markets – turning Hawai'i-made food products into economic drivers beyond our shores.

4. Policy Alignment & Branding – Maximizing Hawai'i's Competitive Advantage

The bill aligns and harmonizes “Hawai'i Made” and “Hawai'i Grown” branding initiatives. DBEDT's economic framework highlights Hawai'i's brand as a core export advantage; fragmentation weakens its value.

Brand alignment:

- Reduces duplication
- Improves market clarity
- Increases producer returns, and
- Supports the State's mandate to grow value-added production and exports.

5. Performance Accountability – Results-Based Governance

HB2459, HD1 establishes measurable performance indicators including:

- Businesses graduating to commercial operations
- Growth in value-added output
- Export expansion
- Workforce credentials
- Contributions to food security
- Leveraged private and federal funds

This mirrors DBEDT's shift toward data-driven, outcome-based economic development, ensuring FPIN delivers measurable economic impact.

Mahalo for the opportunity to provide testimony.

CHAIRPERSON

CRAIG K. NAKAMOTO
EXECUTIVE DIRECTOR

Statement of
CRAIG K. NAKAMOTO
Executive Director
Hawai'i Community Development Authority
before the
HOUSE COMMITTEE ON CONSUMER PROTECTION & COMMERCE

Wednesday, February 18, 2026
2:00 p.m.
State Capitol, Conference Room 329 & Videoconference

In consideration of
HB 2459, HD1
RELATING TO THE FOOD AND PRODUCT INNOVATION NETWORK.

Chairperson Matayoshi, Vice Chairperson Grandinetti, and members of the Committee.

The Hawai'i Community Development Authority (HCDA) respectfully offers **comments** on HB 2459, HD1, which requires the Food and Product Innovation Network to integrate a coordinated food safety and regulatory framework; requires the Agribusiness Development Corporation to establish performance indicators for the Food and Product Innovation Network, develop a market access strategy, align and harmonize state branding initiatives, and report certain data to the Legislature; appropriates funds.

HB 2459, HD1 amended the measure by inserting language that appropriates an unspecified amount of funds to the Agribusiness Development Corporation for the operations of the Food and Product Innovation Network. Funds will allow the Food and Product Innovation Network to provide technical assistance to ensure compliance with testing, validation, and certification requirements. This is particularly critical for the High-Pressure Processing Facility at the Central Oahu Agriculture and Food Hub, as it serves as a cornerstone for advancing food safety, extending shelf life, and supporting local producers in meeting compliance standards.

Thank you for the opportunity to testify on this measure.

HB 2459 HD1 – RELATING TO THE FOOD AND PRODUCT INNOVATION NETWORK

Chair Matayoshi, Vice Chair Grandinetti, and Members of the Committee:

Thank you for the opportunity to provide testimony offering comments on HB 2459 HD1 relating to the Food and Product Innovation Network.

The measure requires the Food and Product Innovation Network (FPIN) to integrate a coordinated food safety and regulatory framework. Requires the Agribusiness Development Corporation to establish performance indicators for the FPIN, develop a market access strategy, align and harmonize state branding initiatives, and report certain data to the Legislature. Appropriates funds.

University of Hawai'i College of Tropical Agriculture and Human Resilience (CTAHR) faculty have expertise in the fields of food safety, food science, human nutrition, regulatory compliance education and aspects of food innovation. CTAHR supports the State's food security and economic diversification goals and looks forward to its continuous collaboration with Hawai'i Department of Education's Regional Kitchen program and assisting agricultural entrepreneurs grow and create value-added products for local and global consumption. The appropriation in HB 2459 HD1 will support statewide community assets.

Thank you for the opportunity to submit testimony.

HOUSE BILL NO. 2459, HD1
RELATING TO THE FOOD AND PRODUCT INNOVATION NETWORK

Chairperson Matayoshi, Vice Chair Nakada Grandinetti, and Members of the Committee:

The Agribusiness Development Corporation (ADC) **supports** HB2459, HD1. HB2459,HD1 amends ADC's statutes to strengthen its role in developing a coordinated and performance-driven food and product innovation system for Hawai'i. The measure clarifies ADC's authority to support an integrated food safety and regulatory framework, establish performance indicators for the Food and Product Innovation Network (FPIN), develop a market access strategy, align state branding initiatives, and improve data reporting to the Legislature.

ADC's statutory mission is to promote diversified agriculture and value-added agricultural enterprises. HB2459,HD1, modernizes this mission by recognizing the growing importance of food processing, innovation facilities, and export-ready products. The bill strengthens ADC's ability to coordinate infrastructure, regulatory navigation, and market access for food and product manufacturers.

HB2459,HD1, advances a framework aligned with applicable federal and state food safety laws, regulations, rules, and food codes. This coordination is

essential for ADC-supported shared-use facilities and innovation hubs that serve multiple producers. The bill promotes coordination with the Department of Health, the Department of Agriculture and Biosecurity, CATERS, and other relevant agencies to streamline permitting, inspections, and certification while maintaining public health protections.

ADC supports the bill's requirement for measurable performance indicators aligned between governing boards and legislative oversight. These should include:

- number of businesses served and graduating from FPIN facilities;
- increases in value-added agricultural and food manufacturing output;
- job creation and business survivorship;
- time to regulatory approval and product launch; and
- market penetration into institutional, tourism, and export channels.

These metrics ensure that public investments are accountable and outcome driven.

HB2459,HD1 recognizes that production and processing must be paired with coordinated logistics and market access. ADC supports strategies that integrate aggregation, cold storage, distribution, tourism demand, and export infrastructure, including sustained international partnerships. Aligning and harmonizing state branding initiatives will strengthen consumer trust and improve the value of Hawai'i-grown and Hawai'i-made products.

The bill supports coordinated technical assistance for labeling, testing, validation, and certification requirements and coordination with regulatory agencies. Integrating regulatory compliance education into workforce development and training programs will ensure that Hawai'i's food workforce is prepared for regulated manufacturing and export markets.

HB2459,HD1 strengthens data collection and reporting through surveys, economic data, and automated systems using key performance indicators benchmarked against other states and countries. This supports evidence-based policymaking and continuous improvement.

HB2459,HD1 advances the objectives of **Act 175** by strengthening food safety coordination, processing capacity, and market access so local producers can reliably meet institutional procurement needs, including public school meal programs.

HB2459,HD1 is expected to improve coordination across agencies, reduce duplicative regulatory processes, and increase the effectiveness of public investments in food system infrastructure. While initial implementation may require staff coordination and system development, performance indicators and automated reporting will improve efficiency and accountability over time. These improvements are expected to support private-sector growth in value-added agriculture and food manufacturing.

HB2459,HD1 modernizes ADC's statutory authority and establishes a coordinated, accountable framework for Hawai'i's food and product innovation system. By aligning regulation, food safety, branding, logistics, market access, workforce development, and data reporting, the bill supports Act 175 and strengthens Hawai'i's food economy.

For these reasons, the Agribusiness Development Corporation strongly supports HB2459,HD1.

February 18, 2026

HEARING BEFORE THE
HOUSE COMMITTEE ON CONSUMER PROTECTION & COMMERCE

TESTIMONY ON HB 2459, HD1
RELATING TO THE FOOD AND PRODUCT INNOVATION NETWORK

Conference Room 329 & Videoconference
2:00 PM

Aloha Chair Matayoshi, Vice-Chair Grandinetti, and Members of the Committee:

I am Brian Miyamoto, Executive Director of the Hawai'i Farm Bureau (HFB). Organized since 1948, the HFB is comprised of 1,800 farm family members statewide and serves as Hawai'i's voice of agriculture to protect, advocate, and advance the social, economic, and educational interests of our diverse agricultural community.

The Hawai'i Farm Bureau supports HB 2459, HD1, which strengthens and expands the Food and Product Innovation Network (FPIN) within the Agribusiness Development Corporation to better support agricultural producers and food businesses through coordinated workforce development, regulatory navigation, value-added processing, market access, and performance accountability.

The Hawai'i Farm Bureau has been a strong and consistent supporter of the Food and Product Innovation Network and its role in helping farmers, producers, and food businesses move beyond raw production into value-added processing, manufacturing, and expanded market opportunities. FPIN reflects years of collaborative work among ADC, educational institutions, industry partners, and State agencies to strengthen Hawai'i's food system and diversify the agricultural economy.

HB 2459, HD1 builds on that foundation by improving coordination, accountability, and statewide integration of FPIN activities. The bill's emphasis on workforce development, regulatory navigation, market access, branding alignment, and performance measurement will help ensure that FPIN continues to provide practical, results-oriented support to farmers and food businesses seeking to scale up and enter new markets.

We also support efforts to integrate food safety education and technical assistance into FPIN. Food safety compliance is often one of the most significant barriers preventing farmers and processors from expanding their operations or accessing institutional and

export markets. Providing coordinated guidance and readiness support can help reduce confusion and improve compliance outcomes.

At the same time, it is important to clarify that ADC's role in food safety should remain one of coordination, education, and technical assistance, rather than regulatory oversight or auditing. Regulatory authority and enforcement appropriately reside with existing state, federal, and third-party entities. In addition, food safety requirements vary significantly depending on the type of crop or product, and implementation should remain flexible and risk-based so that small, diversified, and value-added producers are not unintentionally burdened by requirements that do not apply to their operations. Implementation should also avoid creating duplicative regulatory or compliance layers that overlap with existing state, federal, or private sector food safety systems.

HB 2459, HD1 represents an important opportunity to strengthen FPIN as a statewide resource that connects agricultural production to processing, compliance, branding, and markets. With thoughtful implementation and continued coordination with industry stakeholders, the measure can further support local food production, economic diversification, and food system resilience.

Thank you for the opportunity to testify in support of this measure.
