‘ŌNAEHANA KULANUI O HAWAII

Legislative Testimony

Hō'ike Mana'o I Mua O Ka 'Aha'ōlelo

Testimony Presented Before the
House Committee on Higher Education
March 25, 2026 at 2:10 p.m.

By

Lui Hokoana

Interim Vice President for Community Colleges
University of Hawai'i System

SB 2706 SD1 HD1 – RELATING TO WORKFORCE DEVELOPMENT.

Chair Garrett, Vice Chair Amato, and Members of the Committee:

The University of Hawai'i Community Colleges (UHCC) supports the intent of SB 2706 SD1 HD1, which would establish a five-year Agriculture and Biosecurity Workforce Development Pilot Program within the Department of Agriculture and Biosecurity (DAB), in collaboration with the University of Hawai'i at Leeward Community College (LeeCC) and the Department of Human Resources Development (DHRD). The UHCCs support this measure because it advances a practical and outcomes-driven approach to strengthening Hawai'i's workforce capacity in agriculture and biosecurity, areas that are essential to the state's resilience, food security, and public health. The pilot's emphasis on curriculum development, hands-on training, and real-world work opportunities aligns with best practices for building career pathways that lead to employment and advancement.

While the UHCCs welcome the partnership with DAB and DHRD, we wish to clarify the collaborative framework. To ensure program success and maintain compliance with institutional accreditation, LeeCC will lead the academic development of the curriculum, ensuring that the 'broad spectrum of topics' mandated in Section 1(b)(1) aligns with established higher education standards and lead to recognized industry credentials. This partnership allows DAB to define the 'what' (the skills needed), while the University defines the 'how' (the instructional delivery).

Furthermore, the UHCCs note that the development of a specialized biosecurity curriculum is a resource-intensive endeavor. To successfully launch this pilot, the UHCCs respectfully requests that the legislature consider a specific appropriation for FY 2026-27 to support specialized faculty and the procurement of necessary training materials. Without a dedicated funding stream, the development of this new career pathway may divert resources from existing programs.

LeeCC is prepared to contribute meaningfully to this effort through its established workforce development infrastructure and experience designing and delivering industry-responsive training. LeeCC's role as an open-access institution also positions the College to serve residents across a range of backgrounds, including working adults and

non-traditional learners seeking upskilling, reskilling, and rapid entry into employment.

The University of Hawai'i supports the intent of SB 2706 SD1 HD1, as long as its passage does not replace or adversely impact priorities as indicated in our BOR Approved Budget.

Thank you for the opportunity to provide testimony in support of SB 2706 SD1 HD1.

State Capitol, Conference Room 325**

**In consideration of
SENATE BILL 2706, SENATE DRAFT 1, HOUSE DRAFT 1
RELATING TO WORKFORCE DEVELOPMENT**

Senate Bill 2706, Senate Draft 1, House Draft 1 establishes a five-year Agriculture and Biosecurity Workforce Development Pilot Program within the Department of Agriculture and Biosecurity, in collaboration with the University of Hawai'i's Leeward Community College and the Department of Human Resources Development; requires a report to the Legislature; appropriates funds; and sunsets on 6/30/2031. **The Department of Land and Natural Resources (Department) supports this measure, provided that its passage does not replace or adversely impact priorities indicated in the Executive Supplemental Budget request.**

The Department supports establishing a pilot program for workforce development in agriculture and biosecurity. It recognizes the urgent need to train students who will have the skills and knowledge to work in biosecurity roles across Hawai'i. The Department is aware that there are currently not enough qualified candidates to fill positions at the Department of Agriculture and Biosecurity (DAB). This workforce development initiative would provide students with the appropriate training and experience to become qualified candidates for DAB staff and to help address the state's agriculture and biosecurity challenges.

Mahalo for the opportunity to comment on this measure.

**SENATE BILL NO. 2706, SD1, HD1
RELATING TO WORKFORCE DEVELOPMENT**

Chair Garrett, Vice Chair Amato, and Members of the Committee:

Thank you for the opportunity to testify on Senate Bill No. 2706, SD1, HD1, relating to workforce development. This measure establishes a five-year Agriculture and Biosecurity Workforce Development Pilot Program within the Department of Agriculture and Biosecurity (Department), in collaboration with the University of Hawai'i's Leeward Community College (LCC) and the Department of Human Resources Development (DHRD); requires a report to the Legislature; appropriates funds; sunsets 6/30/2031; and is effective 7/1/3000. The Department supports this measure and offers comments.

The Department believes that access to a stable, well-trained workforce is key to maintaining biosecurity efforts across the State. The Department believes that creating a workforce development program developed in conjunction with LCC and DHRD, such as the one used by the Department of Land and Natural Resources, Division of Conservation and Resources Enforcement for their officers, enables the Department to do the same for a variety of biosecurity-related roles within the Department. Additionally, this program also has the opportunity to create biosecurity-related capacity outside the Department, increasing the capacity for partners and businesses to also implement biosecurity actions into their operations. Should this measure be passed, the Department is eager to continue working with both DHRD and LCC, who have been supportive of the Department's biosecurity efforts. The Department is currently actively recruiting 17 line biosecurity inspectors, one noxious weed specialist, and 3 pest control technicians across the State. This program would enhance recruitment and also enable the Department to phase in additional positions specifically for pest survey, control, and eradication work.

Testimony of Sharon Hurd

March 25, 2026

Page 2 of 2

The Department is appreciative of the inclusion of establishing two full-time equivalent positions to administer the program, and an appropriation for pilot program registration and fees, supplies, books, and other related expenses.

Thank you for the opportunity to testify on this measure.

Director, Department of Human Resources Development

Before the
HOUSE COMMITTEE ON HIGHER EDUCATION
Wednesday, March 25, 2026
2:10PM
State Capitol, Conference Room 309

In consideration of
SB2706 SD1 HD1, RELATING TO WORKFORCE DEVELOPMENT

Chair Garrett, Vice Chair Amato, and members of the committee:

The Department of Human Resources Development (HRD) appreciates the intent of SB2706 SD1 HD1 and offers the following comments.

SB2706 SD1 HD1 establishes a five-year agriculture and biosecurity workforce development pilot program within the Department of Agriculture and Biosecurity, in collaboration with the University of Hawai'i's Leeward Community College and the Department of Human Resources Development.

We are committed to workforce development and training, but the measure does not clearly define our role. Without clarity on our responsibilities, it is difficult to fully evaluate and determine whether additional resources will be needed. We are ready to work with the Legislature to ensure the approach is clear and aligned with existing efforts.

We are available to answer any questions or provide further information as needed.

March 23, 2026

To: Chair Andrew Takuya Garrett, Vice Chair Terez Amato, and the House Committee on Higher Education

Subject: **SB2706 SD1 HD1**, Relating to Workforce Development

Aloha,

I am writing to support SB2706 SD1 HD1. This measure would establish a five-year agriculture and biosecurity workforce development pilot program in collaboration with the Department of Agriculture and Biosecurity, Leeward Community College within the University of Hawai'i, and the Department of Human Resources Development.

In order for Hawai'i to reinvigorate its agriculture sector, we must prioritize building entryways into agriculture as well as assisting beginning farmers with career viability. For years, we have witnessed our farmers aging and the number of farms declining, so we must act quickly to ensure the knowledge and skills are passed onto the next generation of agriculture producers. Hawai'i has the potential to become self-sufficient in food production and we know this because for centuries indigenous peoples of this land were familiar with how to use natural resources strategically and efficiently to feed its people. More farmers means more people equipped with tools to take the power back in being reliant on our own resources instead of needing to import foods from foreign places— and we know how important this is from seeing the effects a pandemic such as COVID-19 in 2020 had across our islands. Building a strong agricultural workforce is a critical step toward achieving local food production goals, but also for developing a resilient emergency preparedness strategy.

I urge the committee to pass SB2706 SD1 HD1. Investing in workforce development for the younger generation to learn skills within agriculture, is investing in our communities' future so we can continue to work towards self-reliance. Creating pathways for people interested in agriculture can help improve our local economy in Hawai'i by increasing agricultural production and replacing the need for imported food, thus keeping more money within communities.

I appreciate the opportunity to testify on this measure and thank you for your consideration.

Mahalo,
Sydney Haas & the Food+ Policy Team
#fixourfoodsystem

The Food+ Policy internship develops student advocates who learn work skills while increasing civic engagement to become emerging leaders. We focus on good food systems policy because we see the importance and potential of the food system in combating climate change and increasing the health, equity, and resiliency of Hawai'i communities.

In 2026, the cohort of interns are undergraduate and graduate students and young professionals working in the food system. They are a mix of traditional and nontraditional students, including parents and veterans, who have backgrounds in education, farming, public health, nutrition, and Hawaiian culture.

March 25, 2026

HEARING BEFORE THE
HOUSE COMMITTEE ON HIGHER EDUCATION

TESTIMONY ON SB 2706, SD1, HD1
RELATING TO WORKFORCE DEVELOPMENT

Conference Room 309 & Videoconference
2:10 PM

Aloha Chair Garrett, Vice-Chair Amato, and Members of the Committee:

I am Brian Miyamoto, Executive Director of the Hawai'i Farm Bureau (HFB). Organized since 1948, the HFB is comprised of 1,800 farm family members statewide and serves as Hawai'i's voice of agriculture to protect, advocate, and advance the social, economic, and educational interests of our diverse agricultural community.

The Hawai'i Farm Bureau supports SB 2706, SD1, HD1, which establishes a five-year agriculture and biosecurity workforce development pilot program within the Department of Agriculture and Biosecurity, in collaboration with the University of Hawaii's Leeward Community College and the Department of Human Resources Development.

Workforce shortages remain one of the most significant challenges facing Hawai'i agriculture and biosecurity. Hawai'i's farmers and ranchers continue to age, and many multigenerational operations face uncertainty due to the lack of a trained next generation prepared to enter agricultural and biosecurity careers. Without intentional workforce development efforts, agricultural lands risk falling out of production, increasing Hawai'i's reliance on imported food, and weakening our biosecurity system.

HFB also notes that both agricultural operations and agricultural agencies face increasing difficulty recruiting qualified candidates due to the specialized education, training, and background experience required for many positions. Farming and ranching jobs today often demand technical skills in equipment operation, pest and disease management, compliance, and safety, while positions within the Department of Agriculture and Biosecurity require scientific, regulatory, or inspection expertise that can be difficult to fill. These workforce gaps highlight the need for targeted training programs that prepare candidates with the skills necessary to succeed in agriculture and biosecurity careers.

HFB has consistently supported initiatives that strengthen agricultural education, training, and career pathways. Prior workforce efforts have demonstrated the importance of

hands-on learning, internships, and clear pathways into employment. SB 2706, SD1, HD1 builds on these principles by emphasizing practical training, collaboration with educational institutions, and alignment with workforce needs within agriculture and biosecurity.

HFB also supports the pilot structure of this program. A defined timeframe allows the State to evaluate outcomes, identify best practices, and make informed decisions about long-term workforce investments. Continued engagement with farmers, ranchers, and industry stakeholders will be essential to ensure that training programs remain relevant and responsive to on-the-ground needs.

Developing a skilled agricultural and biosecurity workforce is critical to growing agriculture in Hawai'i and achieving statewide goals such as doubling local food production, strengthening farm-to-school programs, diversifying the economy, and protecting natural resources. SB 2706, SD1, HD1 represents an important step toward addressing the workforce challenges that must be overcome to reach these objectives.

Thank you for the opportunity to provide testimony.
