

ACT 82

S.B. NO. 778

A Bill for an Act Relating to Protection of Hawaii's Native Flora and Fauna.

Be It Enacted by the Legislature of the State of Hawaii:

SECTION 1. The legislature finds that Hawaii has several rare species of plants, animals, and fish which are found nowhere else in the world. The legislature also finds that Hawaii has sizable areas of high quality native forests which are not placed into the conservation district. To the maximum extent practical, it is the intention of the legislature to preserve Hawaii's unique native flora and fauna by reclassifying such areas as conservation districts.

SECTION 2. Chapter 195D, Hawaii Revised Statutes, is amended by adding a new section to be appropriately designated and to read as follows:

"§195D- Protection of Hawaii's unique flora and fauna. The department of land and natural resources shall initiate amendments to the conservation district boundaries consistent with section 205-4 in order to include high quality native forests and the habitat of rare native species of flora and fauna within the conservation district. The department may seek assistance from appropriate public, private, and nonprofit agencies and may employ consultants as necessary to implement this section."

SECTION 3. Section 205-2, Hawaii Revised Statutes, is amended to read as follows:

"§205-2 Districting and classification of lands. There shall be four major land use districts in which all lands in the State shall be placed: urban, rural, agricultural, and conservation. The land use commission shall group contiguous land areas suitable for inclusion in one of these four major districts. The commission shall set standards for determining the boundaries of each district, provided that:

- (1) In the establishment of boundaries of urban districts those lands that are now in urban use and a sufficient reserve area for foreseeable urban growth shall be included;
- (2) In the establishment of boundaries for rural districts, areas of land composed primarily of small farms mixed with very low density residential lots, which may be shown by a minimum density of not more than one house per one-half acre and a minimum lot size of not less than one-half acre shall be included, except as herein provided;

- (3) In the establishment of the boundaries of agricultural districts the greatest possible protection shall be given to those lands with a high capacity for intensive cultivation; and
- (4) In the establishment of the boundaries of conservation districts, the "forest and water reserve zones" provided in section 183-41 are renamed "conservation districts" and, effective as of July 11, 1961, the boundaries of the forest and water reserve zones theretofore established pursuant to section 183-41, shall constitute the boundaries of the conservation districts; provided that thereafter the power to determine the boundaries of the conservation districts shall be in the commission.

In establishing the boundaries of the districts in each county, the commission shall give consideration to the master plan or general plan of the county.

Urban districts shall include activities or uses as provided by ordinances or regulations of the county within which the urban district is situated.

Rural districts shall include activities or uses as characterized by low density residential lots of not more than one dwelling house per one-half acre in areas where "city-like" concentration of people, structures, streets, and urban level of services are absent, and where small farms are intermixed with low density residential lots except that within a subdivision, as defined in section 484-1, the commission for good cause may allow one lot of less than one-half acre, but not less than 18,500 square feet, or an equivalent residential density, within a rural subdivision and permit the construction of one dwelling on such lot, provided that all other dwellings in the subdivision shall have a minimum lot size of one-half acre or 21,780 square feet. Such petition for variance may be processed under the special permit procedure. These districts may include contiguous areas which are not suited to low density residential lots or small farms by reason of topography, soils, and other related characteristics.

Agricultural districts shall include activities or uses as characterized by the cultivation of crops, orchards, forage, and forestry; farming activities or uses related to animal husbandry, aquaculture, game and fish propagation; aquaculture, which means the production of aquatic plant and animal life for food and fiber within ponds and other bodies of water; wind generated energy production for public, private and commercial use; services and uses accessory to the above activities including but not limited to living quarters or dwellings, mills, storage facilities, processing facilities, and roadside stands for the sale of products grown on the premises; wind machines and wind farms; agricultural parks; and open area recreational facilities, including golf courses and golf driving ranges, provided that they are not located within agricultural district lands with soil classified by the land study bureau's detailed land classification as overall (master) productivity rating class A or B.

These districts may include areas which are not used for, or which are not suited to, agricultural and ancillary activities by reason of topography, soils, and other related characteristics.

Conservation districts shall include areas necessary for protecting water-sheds and water sources; preserving scenic and historic areas; providing park lands, wilderness, and beach reserves; conserving indigenous or endemic plants, fish, and wildlife; including those which are threatened or endangered; preventing floods and soil erosion; forestry; open space areas

ACT 82

whose existing openness, natural condition, or present state of use, if retained, would enhance the present or potential value of abutting or surrounding communities, or would maintain or enhance the conservation of natural or scenic resources; areas of value for recreational purposes; other related activities; and other permitted uses not detrimental to a multiple use conservation concept.”

SECTION 4. Statutory material to be repealed is bracketed. New statutory material is underscored.¹

SECTION 5. This Act shall take effect upon its approval.

(Approved May 30, 1987.)

Note

1. Edited pursuant to HRS §23G-16.5.
